A Usable Collection Jan Lucassen, Aad Blok, Huub Sanders, 2025-10-01 Established in 1935 the International Institute of Social History IISH is one of the world's leading research institutes focused on social history and holds one of the richest collections in the field This volume brings together thirty five essays in honor of the IISH's longtime director Jaap Kloosterman who built the institute into a world leader in the field

Placing Internationalism Stephen Legg, Mike Heffernan, Jake Hodder, Benjamin Thorpe, 2021-11-04 Exploring how modern internationalism emerged as a negotiated process through international conferences this edited collection studies the spaces and networks through which states civil society institutions and anti colonial political networks used these events to realise their visions of the international Taking an interdisciplinary approach contributors explore the spatial paradox of two fundamental features of modern internationalism First internationalism demanded the overcoming of space transcending the nation state in search of the shared interests of humankind Second internationalism was geographically contingent on the places in which people came together to conceive and enact their internationalist ideas From Paris 1919 to Bandung 1955 and beyond this book explores international conferences as the sites in which different forms of internationalism assumed material and social form While international permanent institutions such as the League of Nations UN and Institute of Pacific Relations constantly negotiated national and imperial politics lesser resourced political networks also used international conferences to forward their more radical demands Taken together these conferences radically expand our conception of where and how modern internationalism emerged and make the case for focusing on internationalism in a contemporary moment when its merits are being called into question

Europe in Crisis Mark Hewitson, Matthew D'Auria, 2012 The period between 1917 and 1957 starting with the birth of the USSR and the American intervention in the First World War and ending with the Treaty of Rome is of the utmost importance for contextualizing and understanding the intellectual origins of the European Community During this time of crisis many contemporaries especially intellectuals felt they faced a momentous decision which could bring about a radically different future The understanding of what Europe was and what it should be was questioned in a profound way forcing Europeans to react The idea of a specifically European unity finally became at least for some a feasible project not only to avoid another war but to avoid the destruction of the idea of European unity This volume reassesses the relationship between ideas of Europe and the European project and reconsiders the impact of long and short term political transformations on assumptions about the continent's scope nature role and significance
