Featuring research on entrepreneurship, operations management, marketing, business modeling and fashion technology, this publication is an extensive reference source for practitioners, academics, researchers and students interested in the dynamics of the fashion industry.

**The Visual Imperative** Lindy Ryan, 2016-03-14 Data is powerful. It separates leaders from laggards and it drives business disruption, transformation and reinvention. Today's most progressive companies are using the power of data to propel their industries into new areas of innovation, specialization and optimization. The horsepower of new tools and technologies have provided more opportunities than ever to harness, integrate and interact with massive amounts of disparate data for business insights and value something that will only continue in the era of the Internet of Things. And as a new breed of tech savvy and digitally native knowledge workers rise to the ranks of data scientist and visual analyst, the needs and demands of the people working with data are changing too. The world of data is changing fast. And it's becoming more visual. Visual insights are

becoming increasingly dominant in information management and with the reinvigorated role of data visualization this imperative is a driving force to creating a visual culture of data discovery The traditional standards of data visualizations are making way for richer more robust and more advanced visualizations and new ways of seeing and interacting with data However while data visualization is a critical tool to exploring and understanding bigger and more diverse and dynamic data by understanding and embracing our human hardwiring for visual communication and storytelling and properly incorporating key design principles and evolving best practices we take the next step forward to transform data visualizations from tools into unique visual information assets Discusses several years of in depth industry research and presents vendor tools approaches and methodologies in discovery visualization and visual analytics Provides practicable and use case based experience from advisory work with Fortune 100 and 500 companies across multiple verticals Presents the next generation of visual discovery data storytelling and the Five Steps to Data Storytelling with Visualization Explains the Convergence of Visual Analytics and Visual discovery including how to use tools such as R in statistical and analytic modeling Covers emerging technologies such as streaming visualization in the IOT Internet of Things and streaming animation

**Instrumental Intimacy** Melissa M. Littlefield,2018-03-01 A critical examination of the rise of wearable EEG monitors From Fitbits to GPS trackers wearables promise to help us understand and improve ourselves in quantified ways We count our steps track our location and even monitor our brain waves as we strive to achieve better fitness clearer direction or a more focused mind But why do we rely on wearables to learn about ourselves In Instrumental Intimacy Melissa M Littlefield questions our desire for mechanistic guidance by examining brain based EEG wearables that promise to improve sleep relationships self knowledge and learning Littlefield focuses specifically on EEGs transition out of the laboratory and into the hands of consumers While other brain imaging technologies such as MRI PET and MEG are used only in specialized laboratories human electroencephalography a k a EEG is embedded in portable user friendly devices These direct to consumer wearables visualize brain activity as accessible data and many offer the promise of self optimization Littlefield's illuminating book brings the histories of EEG to bear on the contemporary development of EEG wearables via case studies of EEG based sleep aids bio mapping instruments fashionable surveillance tools and athletic training devices The author argues that over the past century applied uses of EEG helped to create new states of mind to be monitored and manipulated as well as discourses about the existence of brain waves and their viability as a tool for brain optimization By contextualizing and analyzing EEG wearables Instrumental Intimacy provides a crucial intervention in an emergent consumer market and in the scholarly fields of STS critical neuroscience and the history of technology *Marketing* Paul Baines,Sara Rosengren,Paolo Antonetti,2022 How does Google support organizations in their transformation to digital marketing How does the International Food Waste Coalition influence more sustainable behaviour How did a producer of Thai herbal toothpaste amend their marketing mix to maintain sales during COVID 19 With insights from leading practitioners and exploration of the

[From Human-Centered Design to Human-Centered Society](#) William B. Rouse,2024-01-31 A human centered society creatively balances investments in sources of innovation while also governing in a manner that eventually limits exploitation by originators once innovations have proven their value in the marketplace broadly defined to include both private and public constituencies The desired balance requires society to invest in constituencies to be able to create innovations that provide current and future collective benefits while also assuring society provides laws courts police and military to protect individual rights to life liberty and the pursuit of happiness The balance addresses collectivism vs individualism Collectivism emphasizes the importance of the community Individualism in contrast is

focused on the rights and concerns of each person Unity and selflessness or altruism are valued traits in collectivist cultures independence and personal identity are central in individualistic cultures Collectivists can become so focused on collective benefits that they ignore sources and opportunities for innovation Individualists can tend to invest themselves almost irrationally in ideas and visions many of which will fail but some will transform society Collectivists need to let individualists exploit their successful ideas Individualists need to eventually accept the need to provide collective benefits This book addresses the inherent tension underlying the pursuit of this balance It has played a central role in society at least since the Industrial Revolution 1760 1840 Thus the story of this tension how it regularly emerges and how it is repeatedly resolved for better or worse is almost a couple of centuries old Creating a human centered society can be enabled by creatively enabling this balance Explicitly recognizing the need for this balance is a key success factor This book draws upon extensive experiences within the domains of transportation and defense computing and communications the Internet and social media health and wellness and energy and climate Balancing innovation and exploitation takes varying forms in these different domains Nevertheless the underlying patterns and practices are sufficiently similar to enable important generalizations
