Mac User's Guide to Living Wirelessly Brad Miser, 2005 The major force driving people to embrace wireless computing is WiFi. Once dismissed as a fad, WiFi is rapidly becoming ubiquitous in the US and around the world. In 2004, more than half of all laptops sold in the US shipped with WiFi installed. By 2007, most analysts predict that nearly every laptop sold in the US will include WiFi. Nearly 20 million WiFi access points will be sold this year, up 20% from last year. As these numbers grow, prices will continue to fall, making WiFi more attractive to more and more people. By the end of this year, there will be more than 40,000 hotspots public WiFi access points available across the US in hotels, fast food restaurants, cafés, airports, even parks. By 2007, that number will surpass 100,000. From McDonald's to Kinko's to Holiday Inn, WiFi is becoming a killer amenity. Once WiFi networks are in place, they can be used for much more than just Internet access. For example, the AirPort Express allows users to stream iTunes throughout their homes wirelessly. WiFi is being used to network printers, cameras, and ultimately, home entertainment devices.
