**Science and Technology in Homeric Epics** S. A. Paipetis, 2008-10-20 In the Homeric Epics important references to specific autonomous systems and mechanisms of very advanced technology such as automata and artificial intelligence as well as to almost modern methods of design and production are included Even if those features of Homeric science were just poetic concepts which on many occasions does not explain the astonishing details of design and manufacture like the ones included in the present volume they seem to prove that these achievements were well within human capability In addition the substantial development of machine theory during the early post Homeric age shows that the Homeric descriptions were a kind of prophetic conception of these machines and scientific research must be a quest for the fundamental principles of knowledge available during the Late Bronze Age and the dawn of the Iron Age Such investigations must of necessity be strongly interdisciplinary and also proceed continuously in time since as science progresses new elements of knowledge are discovered in the Homeric Epics amenable to scientific analysis This book brings
