Avionics Navigation Systems Paperback International Edition:

Inertial Navigation Systems with Geodetic Applications Christopher Jekeli, 2012-10-25 This book covers all aspects of inertial navigation systems INS including the sensor technology and the estimation of instrument errors as well as their integration with the Global Positioning System GPS for geodetic applications. Complete mathematical derivations are given. Both stabilized and strapdown mechanizations are treated in detail. Derived algorithms to process sensor data and a comprehensive explanation of the error dynamics provide not only an analytical understanding but also a practical implementation of the concepts. A self-contained description of GPS with emphasis on kinematic applications is one of the highlights in this book. The text is of interest to geodesists including surveyors, mappers and photogrammetrists, to engineers in aviation, navigation, guidance, transportation and robotics, and to scientists involved in aerogeophysics and remote sensing.
