ICSI '92 Peter A. B. Ng, 1992 *Technics* Nicholas Baer, Annie Oever, 2025-10-01 Featuring 28 leading international media scholars. *Technics* rethinks technology for the contemporary digital era with cutting edge theoretical, historiographical, and methodological interventions. The volume's contributors explore the ideas of Walter Benjamin, Ursula Le Guin, Bernhard Siegert, Gilbert Simondon, and Sylvia Wynter in conjunction with urgent questions concerning algorithmic media, digital infrastructures, generative AI, and geoengineering. An expansive collection of writings on media technologies in the digital age, *Technics* is an essential resource for students and scholars of film and media studies, digital humanities, science, and technology studies, and the philosophy of technology.

The Body in Language: An Anthology Contributors, 2019-03-13 The question of the body's place in language has enduring significance. Is there a more equivalent imprint on the language of our life than our own bodies? *The Body In Language: An Anthology* collects an extraordinary range of voices, including writers, artists, performers, and healing practitioners, to present new perspectives on the body in art by exploring the body in language. The selves we release in creativity embody our fundamental being. Can we activate our connective senses to better understand how others make others?

Writing Culture James Clifford, George E. Marcus, 2023-11-15 These seminal essays place ethnography at the intersection of interpretive anthropology, cultural studies, social history, travel writing, discourse theory, and textual criticism. They grapple with issues of power and poetics in contemporary situations of globalization, post-coloniality, and post-modernity. Since its publication in 1986, *Writing Culture* has been a source of generative controversy and innovation in anthropology. It continues to inspire scholars and activists across the humanities, social sciences, and arts who are concerned with experimentation and ethics in cultural analysis. This anniversary edition is augmented with a new foreword by Kim Fortun, Associate Professor of Science and Technology Studies at Rensselaer Polytechnic Institute, exploring the legacies of *Writing Culture* in the twenty-first century.

magazine that ignores boundaries *Ghosts of Archive* Verne Harris,2020-12-21 *Ghosts of Archive* draws on the discourses of deconstruction intersectionality and archetypal psychology to mount an argument that archive is fundamentally and structurally spectral and that the work of archive is justice Drawing on more than 20 years of the author s research on deconstruction and archive the book posits archive as an essential resource for social justice activism and as a source or location of soul for individuals and communities Through explorations of what Jacques Derrida termed hauntology Harris invites a listening to the call for justice in conceptual spaces that are non disciplinary He argues that archive is both constructed in relation to and beset by ghosts ghosts of the living of the dead and of those not yet born and that attention should be paid to them Establishing a unique nexus between a deconstructive intersectionality and traditions of memory for justice in struggles against oppression from South Africa and elsewhere the book makes a case for a deconstructive praxis in today s archive Offering new ideas about spectrality banditry and archival activism *Ghosts of Archive* should appeal to those working in the disciplines of archival science information studies and psychology It should also be essential reading for those with an interest in social justice issues transitional justice history philosophy memory studies and postcolonial studies
