Awwa Manual M 49:

Butterfly Valves - Torque, Head Loss, and Cavitation Analysis American Water Works Association, 2001 Recommended practices calculations and data for correctly specifying and using butterfly valves in any water piping system Second edition

Butterfly Valves American Water Works Association, Bayard E. Bosserman, Amzad Ali, Irving M. Schuraytz, 2012 Updated from the 2001 edition this new manual has expanded equations for eccentricity torque added torque sign conventions and double offset disc design variables Water operators receive complete information about the versatile butterfly valve in drinking water service Engineers and technicians will gain a basic understanding of calculations for operating torque head loss and cavitation Coverage includes valve design torque head loss cavitation testing noise and vibration Corrosion Policy Decision Making Reza Javaherdashti, 2021-12-29 CORROSION POLICY DECISION MAKING Explore the science management economy ecology and engineering of corrosion management and prevention In Corrosion Policy Decision Making distinguished consultant and corrosion expert Dr Reza Javaherdashti delivers an insightful overview of the fundamental principles of corrosion with a strong focus on the applicability of corrosion theory to industrial practice The authors demonstrate various aspects of smart corrosion management and persuasively make the case that there is a real difference between corrosion management and corrosion knowledge management The book contains seven chapters that each focuses on one important aspect of corrosion and corrosion management Corrosion management is an issue that is not just corrosion science or corrosion engineering but rather a combination of both elements To cover this paradoxical aspect of corrosion management chapter 2 deals with some basic introductory concepts and principles of corrosion and coating painting an important corrosion protection method while chapter 3 explains the elements of smart corrosion management in detail Another important principle of smart corrosion management is to be able to study the cost of corrosion chapter 4 introduces important points in the economics involved in a smart corrosion management As indicated earlier corrosion engineering is also an integral part of corrosion management and thus chapter 5 looks at the engineering side of corrosion by detailing the example of Process Additives EMPA Chapter 6 for the first time looks at the possibility of using TRIZ algorithm of invention in corrosion management Finally chapter 7 presents the necessary elements for building a model that would explore the mutual interaction between corrosion and environment mainly by exploring the difference between environmental impact and environmental effect Chapter 7 is also very important because the four models so far applied to estimate the cost of corrosion Uhlig Method Hoar Method I O method and LCC method are not capable of suggesting any clear model or a sensible way of exploring the elements necessary to explain the impact of indirect costs of corrosion the most important of which being environmental damages imposed by corrosion This book is ideal for engineers students and managers working or studying corrosion Corrosion Policy Decision Making is also an indispensable resource for professionals in the fields of upstream and downstream on shore off shore oil and gas transportation mining power generation as well as

major sectors of other strategic industries Water Transmission and Distribution American Water Works Association,2003
Water distribution systems are made up of pipe valves and pumps through which treated water is moved from the treatment plant to homes offices industries and other consumers The types of materials and equipment used by each water system are usually governed by local conditions past practices and economics Consequently drinking water professionals must be knowledgeable about common types of equipment and operating methods that are available Completely revised and updated
Water transmission and distribution includes information on the following distribution system design and operation and maintenance piping materials valves pumps and water meters water main installation backfilling main testing and installation safety fire hydrants water storage water services cross connection control motors and engines instrumentation and control information management and public relations Cover page 4 **Monographic Series** Library of Congress,
