**Education and Development** Simon McGrath,2018-05-08 This title explores the place of education in development

debates and provides a systematic as well as a theoretical overview of the main approaches to education and development. It emphasises the fact that education is profoundly shaped by national and local cultures even if many issues are shared across institutions in different locations. Education and Development discusses different theoretical accounts from different disciplinary traditions to help students understand the complexity of the overall debate. The text does not shy away from discussions of education's negative impacts and insists that an account of education must include consideration of early childhood development, adult vocational and higher education as well as the growing range of informal and distance forms. It includes chapters on human capital, human rights and human development and on education, gender and development and draws on examples from a wide range of countries and regions such as India, Hong Kong, Kenya and South Africa. The book has a well-developed pedagogy including text boxes, chapter summaries, key questions, links to websites and videos and annotated further reading sections. Particular attention is paid to ensuring that a plurality of voices, contexts and educational sub-sectors are represented in the boxes, weblinks and references. Education and Development provides an introductory overview to the field aimed at the undergraduate level while critically engaging with key themes and questions. The book will also be of interest to development practitioners, policymakers, entrepreneurs and corporate employees engaged in aspects of education and development work.

Information Circular, 1980      *Improving National Education Systems After COVID-19*  
 Nuno Crato, Harry Anthony Patrinos, 2024-10-14. This open access book compares and analyses the results in twelve countries of the two latest international student assessments: Progress in International Reading Literacy Study 2021 (PIRLS) and the Programme for International Student Assessment 2022 (PISA) and tries to disentangle the effects of the pandemic from the long-term trends in education. It is one of the first or maybe the first published volumes to provide a global assessment of the devastating impact of the COVID-19 pandemic on student learning as measured by independent international comparative surveys. The 12 countries discussed in this volume represent a wide variety of educational systems including Chile, Ecuador, England, Estonia, Italy, the Netherlands, Poland, Portugal, South Africa, Spain and the United States. It compiles diverse scenarios including countries that are high performers, countries that perform at the OECD mean and countries that are struggling to attain the OECD average. Each country has its history that reflects efforts to cope with pandemic school closures and to improve educational achievement. A major topic discussed in this edited volume is related to understanding the diverse circumstances for the variations in results within different countries: Why did learning loss in specific locations? How much learning was lost? Why is a country continuously declining? Why is another country constantly improving? Why is there higher or less levels of inequality? How is a country regularly improving with an outdated curriculum? Which policies have worked and which ones have not? What can we do now? This book is a valuable contribution to answer these concerns based on a diverse sample of countries and research questions.
