Newly Hired Teachers of Science Julie A. Luft, Shannon L. Dubois, 2015-12-09 Supporting newly hired science teachers has taken on an increased importance in our schools. This book shares the most current information about the status of newly hired science teachers, different ways in which to support newly hired science teachers, and different research approaches that can provide new information about this group of teachers. Chapters in the book are written by those who study the status of beginning science teachers, mentor new teachers, develop induction programs, and research the development of new science teachers. *Newly Hired Teachers of Science* is for administrators who have new science teachers in their schools and districts, professionals who create science teacher induction programs, mentors who work closely with new science teachers, educational researchers interested in studying new science teachers, and even new science teachers. This is a comprehensive discussion about new science teachers that will be a guiding document for years to come.

[Introduction to Biology](#) Alan Axelrod, 1999 A complete guide with questions, answers, and practice tests in the field of biology.

Handbook of College Science Teaching Joel J. Mintzes, 2006 The Handbook offers models of teaching and learning that go beyond the typical lecture/laboratory format and provides rationales for new practices in the college classroom. It is ideal for graduate teaching assistants, senior faculty, and graduate coordinators and mid-career professors in search of reinvigoration.

[Trends in Teaching Experimentation in the Life Sciences](#) Nancy J. Pelaez, Stephanie M. Gardner, Trevor R. Anderson, 2022-05-11 This book is a guide for educators on how to develop and evaluate evidence-based strategies for teaching biological

experimentation to thereby improve existing and develop new curricula. It unveils the flawed assumptions made at the classroom, department, and institutional level about what students are learning and what help they might need to develop competence in biological experimentation. Specific case studies illustrate a comprehensive list of key scientific competencies that unpack what it means to be a competent experimental life scientist. It includes explicit evidence-based guidelines for educators regarding the teaching, learning, and assessment of biological research competencies. The book also provides practical teacher guides and exemplars of assignments and assessments. It contains a complete analysis of the variety of tools developed thus far to assess learning in this domain. This book contributes to the growth of public understanding of biological issues including scientific literacy and the crucial importance of evidence-based decision making around public policy. It will be beneficial to life science instructors, biology education researchers, and science administrators who aim to improve teaching in life science departments. Chapters 6, 12, 14, and 22 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.
