Accounting Theory Thomas G. Evans, 2003 This easy to read accounting theory text contains two distinct but integrated parts. Part One focuses on two interwoven topics: accounting theory formulation and standard setting in a chronological format. This section analyzes the major historical efforts attempted in the development of an accounting theory. The Conceptual Framework project is studied and the FASB and how it influences current standard setting is examined. Part Two covers contemporary financial reporting issues as they relate to the FASB's Conceptual Framework. Controversial accounting areas such as cash flows, accounting for pensions, post employment benefits and stock options are studied within the context of the definitions of assets and liabilities provided by the Conceptual Framework. Interesting and challenging cases provide the reader with practical experience in applying accounting theory.

Financial Accounting Theory William Robert Scott, 2000 Appropriate for Financial Accounting Theory courses at both the senior undergraduate and professional master's levels. This newly revised text provides a theoretical approach to financial accounting in Canada without overlooking institutional structure and standard setting. Important research papers are selected for description and commentary while extensive references to other research papers underlie the text discussion.
