### LS-B200

Thank you for purchasing the TOPCON LS-B200.  
For the best performance of the instruments, please read these instructions carefully and keep them in a convenient location for future reference.

#### GENERAL HANDLING PRECAUTIONS

Before starting work or operation, be sure to check that the system is functioning properly.

- Remove the batteries from the instrument when you will not be using it for long periods.
- Replace all 4 dry batteries with new ones at the same time. Do not mix used and new dry batteries, and do not mix different types of dry batteries together.
- Use alkaline dry batteries. Nickel hydrogen dry batteries and nickel cadmium dry batteries can be used too, but the operating time is different from the time of alkaline dry batteries.
- Do not submerge the instrument in water.
- This instrument is designed based on the International Standard IPX 5, but it is not protected from a high pressure water stream or submergence.
- When washing the instrument, avoid spraying it with a high pressure stream of water from a water hose. The inside of the instrument will be damaged by the water.
- Be sure to charge the battery within the charging temperature range. Charging temperature range: 10 to 40°C.
- Battery is an expendable item. The decline in retained capacity depending on the repeated charging/discharging cycle is out of warranty.
- Affection of the radio waves. When using the instrument in the following place, the strong radio wave may cause faulty operation.
  - Near the instrument emitting strong radio waves, (e.g. Transceiver)
  - Near the radio wave towers such as television or radio.
- When transporting the instrument, provide some protection to minimize risk of shock. Heavy shock may affect beam accuracy.
- In addition to the laser beam emitted from the rotating laser, the laser sensor may be sensitive to smartphone screens, LED lamps, fluorescent lamps, compact fluorescent lamps, and other modulated lights. In this case, turn off these modulated lights that may be the cause, or block them before performing measurement.
- If an object (glass window, car windshield, etc.) that may reflect a laser beam is close to this instrument, the laser sensor may malfunction. When using this instrument, block the laser beam to the direction of a reflective object.  
Examples of malfunctions:
  - The display shows "●●●●" even though the location is not a datum position.
  - Errors occur for the datum position.
  - The display does not show "●●●●" even though the location is a datum position.
- Be sure that the laser emitting window of this instrument, and the beam receiving window of the laser sensor are free from dirt (oil, water droplets, etc.). The measurement result may be in error if these windows are dirty.
