Ba Arch Aalto Collectif:

Inflection 06: Originals Sir Peter Cook, Alison Brooks, Beatriz Colomina, Sean Godsell, Adam Peacock, 2019-09-16 Architects are expected to create original ideas resulting in a unique bespoke design. With the rise of Modern Architecture originality became ingrained in perceptions of good design. As a result originality has become a barometer against which we measure the value of design. However, technology today allows for ease of replication and copies, thus originality in design has become an ostensibly hollow prospect. Originals gathers a wide range of responses varied in their opinions and approaches to originality and authorship in design and architecture. Inflection is a student run design journal based at the Melbourne School of Design University of Melbourne. Born from a desire to stimulate debate and generate ideas it advocates the discursive voice of students academics and practitioners. Founded in 2013 Inflection is a home for provocative writing a place to share ideas and engage with contemporary discourse.

Women in Scandinavian Landscape Architecture Svava Riesto, Henriette Steiner, 2024-12-02 Women were active in landscape architecture in Scandinavia throughout the twentieth century yet little is known about their contribution. This volume therefore asks where are the women in Scandinavian landscape architecture. It thus presents new knowledge about women's contributions to the shaping of modern cities and landscapes in the Scandinavian welfare states. With chapters by some of the most respected architectural and landscape architectural historians as well as up and coming scholars and practice based artistic researchers the book make three major contributions. First it asks the previously neglected question of women's contributions to twentieth century landscape architecture in Denmark, Sweden and Norway. Second it does so from a transnational perspective bringing together researchers from Scandinavia and Finland. Third it documents how collaborative formats for knowledge creation can generate new insights and fruitful links between researchers and research materials. The book brings to light new knowledge and new forms of architectural historical work on the contributions of many women landscape architects to designed open spaces.

The essays in this volume contributed by leading theorists and practitioners from both disciplines focus on three key sites of encounter.
