Mexican Americans Across Generations Jessica Vasquez-Tokos, 2011-04-18 Outstanding Academic Title from 2011 by Choice Magazine While newly arrived immigrants are often the focus of public concern and debate many Mexican immigrants and Mexican Americans have resided in the United States for generations Latinos are the largest and fastest growing ethnic group in the United States and their racial identities change with each generation While the attainment of education and middle class occupations signals a decline in cultural attachment for some socioeconomic mobility is not a cultural death knell as others are highly ethnically identified There are a variety of ways that middle class Mexican Americans relate to their ethnic heritage and racialization despite assimilation among a segment of the second and third generations reveals the continuing role of race even among the U S born Mexican Americans Across Generations investigates racial identity and assimilation in three generation Mexican American families living in California Through rich interviews with three generations of middle class Mexican American families Vasquez focuses on the family as a key site for racial and gender

identity formation knowledge transmission and incorporation processes exploring how the racial identities of Mexican Americans both change and persist generationally in families She illustrates how gender physical appearance parental teaching historical era and discrimination influence Mexican Americans racial identity and incorporation patterns ultimately arguing that neither racial identity nor assimilation are straightforward progressions but instead develop unevenly and are influenced by family society and historical social movements *First-Generation Immigrant Families* Julianna

Fields,2015-02-03 The United States has a long history of immigration For centuries people have been coming to this country in search of new lives When they arrive both today and in the past the children usually adapt to the new country first before their parents This creates a unique set of challenges for the family as they live with two cultures and often two languages The families in this book have experienced these challenges and have dealt with problems that came from adjusting to a new place and a new way of life They have struggled done some things wrong and some things right and they have learned much about themselves their families and their cultures *Caring Across Generations* Grace J Yoo,Barbara W Kim,2014-06-20

Menjívar,Leisy J. Abrego,Leah C. Schmalzbauer,2016-09-12 Immigrant Families aims to capture the richness complexity and diversity that characterize contemporary immigrant families in the United States In doing so it reaffirms that the vast majority of people do not migrate as isolated individuals but are members of families There is no quintessential immigrant experience as immigrants and their families arrive with different levels of economic social and cultural resources and must navigate various social structures that shape how they fare Immigrant Families highlights the hierarchies and inequities between and within immigrant families created by key axes of inequality such as legal status social class gender and

generation Drawing on ethnographic demographic and historical scholarship the authors highlight the transnational context in which many contemporary immigrant families live exploring how families navigate care resources expectations and aspirations across borders Ultimately the book analyzes how dynamics at the individual family and community levels shape the life chances and wellbeing of immigrants and their families As the United States turns its attention to immigration as a critical social issue Immigrant Families encourages students scholars and policy makers to center family in their discussions thereby prioritizing the human and relational element of human mobility **Routledge Handbook of Migration and Development** Tanja Bastia, Ronald Skeldon, 2020-02-14 The Routledge Handbook of Migration and Development provides an interdisciplinary agenda setting survey of the fields of migration and development bringing together over 60 expert contributors from around the world to chart current and future trends in research on this topic The links between migration and development can be traced back to the post war period if not further yet it is only in the last 20 years that the migration development nexus has risen to prominence for academics and policymakers Starting by mapping the different theoretical approaches to migration and development this book goes on to present cutting edge research in poverty and inequality displacement climate change health family social policy interventions and the key challenges surrounding migration and development While much of the migration literature continues to be dominated by US and British perspectives this volume includes original contributions from most regions of the world to offer alternative non Anglophone perspectives Given the increasing importance of migration in both international development and current affairs the Routledge Handbook of Migration and Development will be of interest both to policymakers and to students and researchers of geography development studies political science sociology demography and development economics

Remittance as Belonging Hasan Mahmud, 2024-10-11 Remittance as Belonging Global Migration Transnationalism and the Quest for Home argues that migrants remittances express their sense of belonging and connectedness to their home country of origin making an integral part of both migrants ethnic identity and sense of what they call home Drawing on three and a half years of ethnographic fieldwork with Bangladeshi migrants in Tokyo and Los Angeles Hasan Mahmud demonstrates that while migrants go abroad for various reasons they do not travel alone Although they leave behind their families in Bangladesh they move abroad essentially as members of their family and community and maintain their belonging to home through transnational practices including remittance sending By conceptualizing remittance as an expression of migrants belonging this book presents detailed accounts of the emergence growth decline and revival of remittances as a function of transformations in migrants sense of belonging to home **Children's Wellbeing in Immigrant Families** Naomi Anne Shmuel, 2023-07-24 This book studies children's wellbeing from the perspective of Ethiopian immigrant families in Israel It examines how the meeting of cultures within families affects relationships language acquisition and the transmission of cultural heritage across generations after immigration The younger generation born in Israel or having arrived as infants are faced with a reality very

different from their parents' childhood in Ethiopia. The book therefore addresses these key questions: What are the differences between families that enable some children to adopt a hybrid identity while others feel detached? How are the children affected by their experiences in Israeli society and specifically the educational system? What factors in their childhoods foster resilience and how do these children relate to their Ethiopian heritage? The book presents unique insights into the realities experienced by immigrant families using their own narratives as it is based on interviews by the author with 50 members of immigrant families from different generations. It is of special interest to academic courses on wellbeing, family studies, immigrants, diaspora studies, ethnic and religious studies, anthropology, folklore, sociology, gender studies, social work, child psychology, and more.

Across Generations (Emerald Thai Han Nguyen, 2016) This dissertation addresses the changing nature of American families focusing specifically on immigrant extended families. Chapter 1 examines the reasons for these complex living arrangements. For many Americans living with extended kin (non-nuclear family members) is a strategy used to mitigate economic disadvantage, provide support to family members at different life stages, or uphold cultural beliefs about filial responsibility. That racial and ethnic group differences persist after taking into account economic and demographic factors begs the question of whether extended living is always an option of last resort based on low socioeconomic status or needs during certain life stages. Research that points to cultural norms and behaviors provide clues as to how extended living arrangements are motivated by more than just economic or life stage necessities but studies overlook how beliefs about the family change especially through migration and assimilation processes. Analyzing 40 in-depth interviews with Northern California residents including Asian and Latino immigrants and their descendants, this paper fills a gap in the literature by contributing empirical research that demonstrates how cultural beliefs are both durable and changing and offers new ways of understanding how individuals understand and justify their living arrangements with kin. In particular, respondents use cultural scripts/narratives based on beliefs and behaviors from origin countries' migration experiences or racial and ethnic groups to explain their living situations. Cultural scripts reflect the durability of extended family arrangements that are informed by respondents' home country beliefs and are reinforced by the immigrant experience. At the same time, cultural scripts are changing and situationally bounded depending on individuals' economic circumstances and life stages. These findings contribute to the discussion on the changing nature of American families. Chapter 2 explores how immigrants and their children understand extended living arrangements and how they engage in intergenerational cultural transmission. Immigrant families come from Asian and Latin American countries where living with extended kin is common and for whom doubling up is an integration strategy in the United States. The extended family is an important site for observing intergenerational dynamics especially as the older immigrant and younger native-born generations undergo acculturation. Drawing from 33 interviews with immigrant and native-born Asians and Latinos living in extended families, results indicate that older generation respondents view the extended family as a way of maintaining cohesion and

transmitting cultural values to the younger generation. While younger generation respondents embrace coresidence these American born children view extended living differently using bicultural narratives to explain their experiences. Both generations see living together as a cornerstone of the immigrant family experience and yet both acknowledge that it may also be an impediment to the younger generation's future upward mobility. These findings illustrate how the younger generation embedded in dual and in some ways competing ideological contexts must navigate and balance demands to both family and self. Implications for assimilation theories specifically selective assimilation are discussed. Chapter 3 analyzes the consequences of extended living arrangements in terms of labor force participation. Living arrangements have grown more complex in recent years as families continue to adapt to structural changes resulting from the economic recession. In the face of increasing financial uncertainty and occupational instability extended family arrangements living with non nuclear members are an important support mechanism. Although research has examined complex living arrangements among recent migrants it is not clear how these family structures are related to the economic assimilation of immigrant descendants. Using 1996-2015 Current Population Survey CPS data this paper examines how immigrant generation and family structure work in concert to shape individuals labor force participation. In extended families with shared support members may be better able to engage in the labor market compared to families where support is unequal and individuals in immigrant families may be more likely to engage in providing support amongst each other compared to individuals in native born families. Findings indicate that Hispanics, Asians, blacks and whites in extended families have different labor force participation and employment outcomes and that extended living does not operate similarly across generations or among race groups.
