ACSM's Resources for the Health Fitness Specialist American College of Sports Medicine, 2013-03-07 This valuable new resource is specifically designed for candidates for the ACSM's Certified Health Fitness Specialist HFS and those personal trainers wanting to take their knowledge to the next level. It contains the latest material on health and fitness written by the entity setting the standard for scientifically based practice. The American College of Sports Medicine The American College of sports Medicine is the largest sports medicine and exercise science organization in the world. More than 45 000 members are dedicated to advancing and integrating scientific research to provide educational and practical applications of exercise science and sports medicine. *Laboratory Manual for Exercise Physiology* G. Gregory Haff, Charles Dumke, 2021-06 Laboratory Manual for Exercise Physiology Second Edition With HKPropel Access provides guided opportunities for students to translate their scientific understanding of exercise physiology into practical applications in a variety of settings. Written by experts G. Gregory Haff and Charles Dumke the text builds upon the success of the first edition with full color images and the addition of several new online interactive lab activities. The revitalized second edition comprises 16 laboratory chapters that offer a total of 49 lab activities. Each laboratory chapter provides a complete lesson including objectives, definitions of key terms and background information that sets the stage for learning. Each lab activity supplies step by step procedures providing guidance for those new to lab settings so that they may complete the procedures. New features and updates in this edition include the following: Related online learning tools delivered through HKPropel that contain 10 interactive lab activities with video to enhance student learning and simulate the experience of performing the labs in the real world. A completely new laboratory chapter on high intensity fitness training that includes several popular intermittent fitness tests that students can learn to perform and interpret. An appendix that helps estimate the oxygen cost of walking, running and cycling. New research and information pertaining to each laboratory topic. A lab activity finder that makes it easy to locate specific tests. In addition to the interactive lab activities which are assignable and trackable by instructors, HKPropel also offers students electronic versions of individual and group data sheets of standards and norms, question sets to help students better understand laboratory concepts and case studies with answers to further facilitate real world application. Chapter quizzes assessments that are automatically graded may also be assigned by instructors to test comprehension of critical concepts. Organized in a logical progression the text builds upon the knowledge students acquire as they advance. Furthermore the text provides multiple lab activities and includes an equipment list at the beginning of each activity allowing instructors flexibility in choosing the lab activities that will best work in their facility. Laboratory Manual for Exercise Physiology Second Edition With HKPropel Access exposes students to a broad expanse of tests that are typically performed in an exercise physiology lab and that can be applied to a variety of professional settings. As such the text serves as a high quality resource for basic laboratory testing procedures used in assessing human performance health and wellness.
