## **Active Communication Education Ace A Program For Older People With Hearing Impairment:**

**Active Communication Education (ACE)** Louise M. Hickson, Linda Worrall, Nerina Scarinci, 2007 Active Communication Education ACE is a communication awareness and training programme for older people with acquired hearing loss. It provides health professionals working in the community with a step by step programme for running a group education programme for older people with hearing impairment and their partners. *Promoting Self-Management of Chronic Health Conditions* Erin Martz, 2017-08-15 Promoting Self Management of Chronic Health Conditions covers a range of topics related to self management theories and practice interventions that have been scientifically tested and information that individuals with specific conditions should know or be taught by healthcare professionals. *Living with Hearing Difficulties* Dafydd Stephens, 2009-07-28 Living with Hearing Difficulties is a source book for professionals who encounter and support individuals with hearing difficulties. It will also be of interest to people with hearing difficulties themselves and those close to them. The book highlights the concept of audiological enablement as being an interactive process requiring the active involvement of both clinician and patient. The thirteen chapters encompass four sections which broadly follow the categories of the World Health Organization's ICF 2001. Section 1 addresses types of hearing disorders, the impairments they cause and also the process of help seeking. Section 2 deals with the effects of hearing impairment on communication and psychosocial functioning. Section 3 considers the individual in their environment, their family, work and leisure. Section 4 elaborates on the process of enablement in a non prescriptive manner. The authors approach the problems and needs from the standpoint of what the patient/client is seeking. Enablement is seen as a team effort between the professionals, the patient and their family in an ever changing environment. This entails using any relevant techniques to ensure the well being of the individual with hearing impairment that end remains very much their goal. The book also has a companion website [www.wiley.com/go/stephens](http://www.wiley.com/go/stephens) which hosts additional downloadable documents as well as a demonstration of the concept of the signal to noise ratio. **Introduction to Audiologic Rehabilitation** Ronald L. Schow, Michael A. Nerbonne, Gabriel A.

Bargen, Kristina M. Blaiser, Chris A. Sanford, 2024-09 The eighth edition of Introduction to Audiologic Rehabilitation offers a comprehensive exploration of aural rehabilitation spanning across the lifespan. Written in an accessible style for undergraduate students, the text covers the fundamentals, methods of assessment and management, technologies and contemporary issues for a thorough understanding of audiologic rehabilitation practices. Two chapters focus solely on real world case studies addressing the needs of children and adults. There are detailed chapters on hearing aids and hearing assistive technologies, cochlear implants, auditory and visual stimuli in communication, language and speech of the deaf and hard of hearing, psychosocial aspects of hearing loss and more. New to the Eighth Edition: Discussion of current issues and trending topics including over the counter hearing aids, Highlights related to telepractice and teleaudiology, Addition of diversity, equity and inclusion topics related to hearing health disparities and audiologic rehabilitations. **Key Features** Based

on a proven model framed within the concepts of the World Health Organization Authored by leading experts ensuring current evidence based information Emphasis on a multidisciplinary approach recognizing the collaborative nature of audiologic rehabilitation involving professionals in audiology speech language pathology and related fields Case studies offer application opportunities across the lifespan Each chapter includes activities recommended readings and websites for additional resources Visual aids including figures tables and photos enhance student comprehension particularly for complex topics such as cochlear implants and auditory stimulation Appendices containing valuable terms definitions and additional resources for easy reference
