 Lester Grau,2025-12-01 Translated to English from the original Soviet General Staff report this is an account of the naval  
 support of the Petsamo Kirkenes Operation in October 1944 the only large scale ground naval and air operation ever fought  
 in the Arctic With additional contemporary supporting material on wider scale Arctic combat including descriptions of  
 combat tactics and weaponry from noted Soviet military scholar James Gebhardt this book provides a comprehensive and  
 detailed description of the tactics and strategies employed by both Soviet and German forces during the operation from the  
 official Soviet perspective The largest Arctic battle on record involving 133 500 Soviets and 45 000 Germans and Quisling  
 Norwegians the Petsamo Kirkenes Operation sought to liberate the northernmost part of Norway from German occupation  
 during World War II The Soviet navy played a previously unrecognized crucial role in the operation by providing fire support  
 and transportation as well as conducting raids and combat landings on the enemy held coast The harsh Arctic environment  
 including extreme cold ice and limited daylight posed significant challenges to the Soviet and German forces Despite these  
 hardships the Soviet forces achieved their objectives defeated the German Army and successfully liberated the area Arctic
