E. Enenkel, Arnoud S. Q. Visser, 2003 The thirteen articles in this volume deal with the Neo Latin emblem book after the birth of the genre with Andrea Alciato's *Emblemata* libellus 1531 While the interest in emblematics has grown considerably during the last decades the seminal Neo Latin production has received relatively little attention In *Mundus Emblematicus* an international team of experts in the field makes this part of the emblem tradition accessible to a broad scholarly audience The articles cover a variety of emblem books published at the time ranging from influential humanist collections for instance those by Achille Bocchi Hadrianus Junius or Joachim Camerarius to alchemist Michael Maier or religious emblems such as the books of the Calvinist Theodore de Beze or the Jesuit Herman Hugo In each paper subjects dealt with include the historical context of the work and its makers the relation between word and image the structure of the collection as a whole and the emblematic

game intertextuality in word and image Moreover several articles explore the interaction between the emblem and connected literary phenomena like the commonplace book the fable or the use of commentaries All papers are in English and all examples from Latin texts are translated Together these articles show the variety within the Neo Latin emblem production thus challenging traditional approaches of the emblem As such *Mundus Emblematicus* contributes towards a more comprehensive view of the forms and functions of the genre as a whole
