Actieve En Reactieve Industrie Politiek In Nederland:

Varieties of Capitalism and Business History Keetie E. Sluyterman, 2014-11-27 The financial crisis of 2008 brought new urgency to the question how best to organise national economies This volume gives a business history perspective on the Varieties of Capitalism debate and considers the respective merits of the liberal and coordinated market economies It looks at individual firms and business people as well as institutions and takes a long term perspective by covering the whole 20th century The authors examine both continuity and change with a particular focus on the Netherlands a nation with an open economy situated between two countries that oppose each other in the way they organize their economies Germany and Great Britain The Netherlands also provides an important case study with Dutch business maintaining strong links to the United States widely considered to be the typical liberal market economy Contributors address the main topics of the capitalism debate including labour relations corporate governance the firm and its leaders coordination between firms innovation multinationals as agents of change and economic performance They show that the Netherlands moved from a mostly liberal market economy before 1914 towards a coordinated market economy from the 1930s onwards and up to a certain extent back again to a more liberal market economy Under both varieties of capitalism the country experienced economic growth and stagnation but a more equal division of wealth occurred in the coordinated market economy only Wars and international economic crises offered moments for revaluation and changes of tack This book raises questions for every country around the globe How is change being brought about Can one see different results from a liberal or a more coordinated market economy And most critically which system is more effective in bringing prosperity and enabling enough people to share in the wealth

The Economic History of The Netherlands 1914-1995 Jan L. van Zanden, 2005-08-08 Jan L van Zanden in *The Economic History of the Netherlands 1914 1995* answers these questions In the first four chapters the long development of the economy is analysed in detail Central to this part of the book are the rise and decline of managerial enterprise the growth and fall of trade unions and the expansion and crisis of the welfare state The particular Dutch features of these institutional changes are highlighted The second part of the book deals with different periods of growth from 1914 1929 and 1950 1973 and relative stagnation 1929 1950 and 1973 1995 Moreover van Zanden examines the role the Netherlands played in the process of European integration and gives an explanation of the success of the Dutch job machine in the 1980s and 1990s

Capitalist Discipline Arthur Wassenberg, 2013-10-31 This book is not just about corporate strategies and stratagems it is about the Faustian pact between real and financial powers governed by the rules of

minimizing the costs to oneself of imposing losses upon others It is more than about limited rationality and irrationality it is about unlimited rationalisations and limited accountability **Politiek in Nederland** ,1985 Analyse van een groot aantal onderzoeken naar de Nederlandse politiek **Humanisme en religie** Joachim Duyndam,Marcel Poorthuis,Theo de Wit,2005 **Recent verleden** J.J. Woltjer,2012-01-11 Recent verleden is een glashelder en voor iedereen toegankelijk standaardwerk over Nederland in de twintigste eeuw Het geheel vormt geen verzameling feiten en weetjes maar is een uitwerking van de werkelijk belangrijke lijnen en bewegingen die tot het huidige Nederland hebben geleid Het is een breed opgezette geschiedenis van de Nederlandse maatschappij de politieke strijd de economie de sociale en godsdienstige stromingen Niet zozeer individuen staan in het middelpunt als wel de mentaliteit de geest van een periode de idealen en de ideologie n die het individu overstijgen Woltjer probeert greep te krijgen op de krachten van de tijd en heeft het aangedurfd om over alle specialismen heen een groot samenhangend werk te schrijven **Merchants, Bankers, Middlemen** Joost Jonker,1996 **Van tresorier tot thesaurier-generaal** ,1996 **The Netherlands and the Gold Standard, 1931-1936** Richard T. Griffiths,1987-05-31 On 26 September 1936 deep in the night the Dutch cabinet took the decision to cut the guilder s link with gold and to devalue its currency It was the last of the increasingly isolated and beleaguered gold bloc countries to do so having outlasted Switzerland by less than a day the last country in Europe in which holders of a currency could exchange it for gold at the rate which had prevailed before the First World War the last country to leave the gold standard The reason why the Gold Bloc which in September 1936 comprised only France Switzerland and the Netherlands should have hung on so long is something of a puzzle to historians since it has become virtually axiomatic that their recoveries would have begun sooner and proceeded more strongly had they cut the link with gold and devalued their currencies much earlier The fact that the decision not to do so has been seen as perverse combined with the fact that in order to cope with the consequences of that decision governments chose to adopt deflationary policies to correct the economy has led historians for a long time to dismiss a whole generation of politicians and their advisors as stubborn conservative and short sighted The Keynesian revolution and the long post war economic boom had consigned them and their ilk to the dustbin of history for ever **Industrie en regio** Jozef Julius van der Werf,1989 **Industriepolitiek** G. J. Wijers,1982 *De parlementaire behandeling van het monetaire beleid in Nederland sinds 1863* Robert Jacques Schotsman,1987 *Het Nederlands belang bij Indië* Ernest Henri Philippe Baudet,M. Rationaliteit en het schone streven : een studie over kennistoename en vestiging van de naoorlogse agogische wetenschappen.... Antonius Louis Theodorus Notten,1988 **Beyond the Technology Race** Annemieke J. M. Roobeek,1990 During the 1980s governments in all industrial countries have tightened their grip on technological development This book illustrates the technology race between seven industrial countries in the field of information

technology biotechnology and new materials However the analysis of a government's role in technological development goes beyond the simple comparison of financial efforts and policy measures The policies of seven countries are analysed in their specific national context and much attention is paid to the differences in industrial structure the different social and institutional settings and national traditions in government intervention In order to gain insight into the diffusion of new technologies and the shifts in international competitive relations it is necessary to focus on the social base for technological change among the industrial countries In this context there is fundamental work to do for economists political scientists sociologists policy makers technical engineers consultants managers in strategic planning and human resources and so on
