Nuttall, 2006 The workshop brought together experts in genetics molecular and cellular biology physiology engineering physics mathematics audiology and medicine to present current work and to review the critical issues of inner ear function A special emphasis of the workshop was on analytical model based studies Experimentalists and theoreticians thus shared their points of view The topics ranged from consideration of the hearing organ as a system to the study and modeling of individual auditory cells including molecular aspects of function Some of the topics in the book are motor proteins in hair cells mechanical and electrical aspects of transduction by motor proteins function of proteins in stereocilia of hair cells production of acoustic force by stereocilia mechanical properties of hair cells and the organ of Corti mechanical vibration of the organ of Corti wave propagation in tissue and fluids of the inner ear sound amplification in the cochlea critical oscillations cochlear nonlinearity and mechanisms for the production of

otoacoustic emissions This book will be invaluable to researchers and students in auditory science *Auditory Efferent System: New Insights from Cortex to Cochlea* Paul H. Delano, Ana B. Elgoyhen, 2016-09-06 The main function of the sensory systems is the transducing of external stimuli into bioelectrical signals which are conducted through afferent pathways from sensory epithelia to the brain However it is known that descending projections are ubiquitous in the different sensory modalities and in the case of auditory efferents connect the cerebral cortex with sensory receptor cells Several functions have been attributed to the efferent system including protection to acoustic trauma unmasking of auditory stimuli in background noise balance of interaural sensitivity and some cognitive functions like modulation of cochlear sensitivity during selective attention to auditory or visual stimuli In addition there is evidence of a possible involvement of the efferent system in the etiology or treatment of some clinical pathologies like tinnitus In this e book entitled Auditory Efferent System New Insights from Cortex to Cochlea we aimed to give an overview of the advances concerning the descending projections from the auditory cortex to subcortical nuclei and the olivocochlear system In addition different theoretical proposals of efferent functions are presented We think that this e book is an important contribution to the understanding of the efferent system in mammals merging auditory cortex literature with studies performed in the olivocochlear system **Engineering and Mining Journal** ,1922 **Engineering and Mining Journal-press** ,1922
