

What is the difference?

Humans vs. animals

Humans have long considered themselves truly unique. But it turns out that the better word from "unique" is "most advanced". Every year scientists prove that some purely human traits are found in animals.

Clark's nutcrackers

remember for at least half year where they put seeds - and they use 5 thousand caches in a 25-mile area.

Clark's nutcrackers use stones to crack nuts, sometimes surrounding an egg with a bigger stone and hitting it with a smaller one.

Use of tools

Apes in the wild have been recorded to hunt tiger sharks by pulling their ears, tails and pulling them - and dragging them, only to return and eat it again.

Although chimpanzees can't fully communicate verbally, they can do it through sign language.

Long-term memory

Chimpanzees have similar basic arithmetic, mental, non-verbal skills (adding up) as humans.

All great apes, dolphins, elephants and magpies recognize their reflection in the mirror. If they see anything unusual they try to notice it.

Consciousness

Self-awareness

Wild dolphins, which were occurring from as far as 1000 kilometers apart, learned to interact only from dolphins living in captivity, without human trainers.

ALMOST OUTPERFORMED

Human body is inferior to animals - except long-distance running.

Speed

Propeller plane while flying makes:

Fastest flying animal is the falcon flying fast in level flight, reaching 320 km/h

Fastest running animal is cheetah

Fastest swimming fish - shark: mako shark

100 km/h

Vision

Cats have vision 8 times sharper than humans.

8 times sharper than humans

Hearing/communication range

Their sounds travel up to 1300 km

Life span

Longest living animal is a bowhead whale, the record is 205-210 years.

Some turtles live up to 200 years.

Size

Biggest animal is blue whale, biggest weight 200 tons

Long-distance running

But no animal beats humans when it comes to long-distance running.

Human Record, leading ultramarathon runner, did 100 kilometers in 12:45 min
Ultramarathon records:
100 km: 206.63 km
400 km: 411.00 km

Animals And Humans

Shared Lives of Humans and Animals Tuomas Räsänen,Taina Syrjämaa,2017-04-21 The book focuses on animal agency and interactions between humans and animals It explores the reciprocity of human animal relations and the capacity of animals to act and shape human societies The chapters draw on examples from the Global North to explore questions of how industrialization urbanization and human life in modernity have been a Humans and Animals: Intersecting Lives and Worlds Anja Höing,Arieahn Matamonasa Bennett,2016 Relationships between humans and non human animals are deeply complex and often governed by tensions and paradoxes Both wild and domestic metaphorical and real assistants and adversaries animals effortlessly bridge cultural and natural spaces and form an integral part of human lives This volume addresses several currently debated topics in science and culture How shall we rethink rebuild and re envision our relationships with other animals How do we construct ideas of the animal How can we negotiate animal interests against our own In which ways do we make sense and use of animals in human cultural spaces Addressing the non human animal from the standpoint of various social and cultural constructions from a global and multidisciplinary perspective the chapters within this volume do not seek to answer these questions but rather to draw attention to the complexity of the underlying issues and the manifold dimensions of the animal human bond *Perceiving Animals* Erica Fudge,2002 The boundaries between human and beast forged a rugged philosophical landscape across early modern England Spectators gathered in London s Bear Garden to watch the callous and brutal baiting of animals A wave of new scientists performed vivisections on live animals to learn more about the human body In Perceiving Animals the British scholar Erica Fudge traces the dangers and problems of anthropocentrism in texts written from 1558 to 1649 Meticulous examinations of scientific legal political literary and religious writings offer unique and fascinating depictions of human perceptions about the natural world Views carried over from bestiaries medieval treatises on animals posited animals as nonsentient beings whose merits were measured solely by what provisions they afforded humans food medicine clothing travel labor scientific knowledge Without consciences or faith animals were deemed far inferior to humans While writings from the period asserted an enormous biological superiority Fudge contends actual human behavior and logic worked sometimes accidentally to close the alleged gap In the Bear Garden even a man of the lowest social rank had power over a tortured animal sinking him though below the beasts The beast fable itself fails to show a true understanding of animals as it merely attributes human characteristics to beasts in an attempt to teach humanist ideals Scholars and writers continually turned to the animal world for reflection Despite this scientists of the period used animals for empirical and medical knowledge recognizing biological and spiritual similarities but refusing to renege human superiority Including an insightful reexamination of Ben Jonson s Volpone and fascinating looks at works by Francis Bacon Edward Coke and Richard Overton among others Fudge probes issues of animal ownership and biological and spiritual superiority in early modern England that resonate with philosophical quandaries still relevant in contemporary

society **Humans in an Animal's World - How Non-Human Animals Perceive and Interact with Humans** Christian Nawroth,Luigi Baciadonna,Nathan J. Emery,2021-10-20 **Beyond Boundaries** Barbara Noske,1997 Beyond Boundaries steps out into hitherto unknown territory in taking an interdisciplinary approach to the subject of animals the author criticizes the biological determinism characteristic of many biologists as well as the anthropocentrism of many environmentalists and greens who fail to see domestic animals or even humans as part of nature Vast in its scope and vision this book synthesizes an array of disparate research and scholarship and in doing so exposes the tensions and inconsistencies in the view of animals in different areas of Western thought A project of such breadth is unprecedented and there is no existing conceptual structure for a work of this kind it is certain to spark a furore of philosophical debate **Beastly Natures** Dorothee Brantz,2010-08-03 Although the animal may be as Nietzsche argued ahistorical living completely in the present it nonetheless plays a crucial role in human history The fascination with animals that leads not only to a desire to observe and even live alongside them but to capture or kill them is found in all civilizations The essays collected in Beastly Natures show how animals have been brought into human culture literally helping to build our societies as domesticated animals have done or contributing often in problematic ways to our concept of the wild The book begins with a group of essays that approach the historical relevance of human animal relations seen from the perspectives of various disciplines and suggest ways in which animals might be brought into formal studies of history Differences in species and location can greatly affect the shape of human animal interaction and so the essays that follow address a wide spectrum of topics including the demanding fate of the working horse the complex image of the American alligator at turns a dangerous predator and a tourist attraction the zoo gardens of Victorian England the iconography of the rhinoceros and the preference it reveals in society for myth over science relations between humans and wolves in Europe and what we can learn from society s enthusiasm for political animals such as the pets of the American presidents and the Soviet Union s space dogs Taken together these essays suggest new ways of looking not only at animals but at human history Contributors Mark V Barrow Jr Virginia Tech Peter Edwards Roehampton University Kelly Enright Rutgers University Oliver Hochadel Universitat Aut noma de Barcelona Uwe L bken Rachel Carson Center Munich Garry Marvin Roehampton University Clay McShane Northeastern University Amy Nelson Virginia Tech Susan Pearson Northwestern University Helena Pycior University of Wisconsin Milwaukee Harriet Ritvo Massachusetts Institute of Technology Nigel Rothfels University of Wisconsin Milwaukee Joel A Tarr Carnegie Mellon University Mary Weismantel Northwestern University **Humans and Other Animals** Barbara Noske,1989

Companion Animals in Human Health: Quality of life outcomes : psychosocial aspects of human-animal interactions ,1879 Exactly how do animals affect the quality of life of their human companions The 7th International Conference on Animals Health and Quality of Life set out to explore this question A major result of this quest was Companion Animals in Human Health a careful selection of jurored and invited papers from that conference The articles in this volume address Human

Animal Interaction HAI according to the elements that define quality of life physical mental emotional and social health functional health and general well being Beginning with an overview of human animal interaction from historical and value perspectives the authors develop a conceptual framework for HAI research and quality of life measurement They then go on to explore the psychosocial and physiological impact of HAI The concluding sections address the role of companion animals in human development and the training and welfare of animals in therapeutic programs **Animals in Person** John Knight,2020-08-29 Our relationship with animals is complex and contradictory we hunt kill and eat them yet we also love respect and protect them This ambivalent relationship is further complicated by the fact that we attribute human emotions and intelligence to animals We even go as far as likening them to children and treating them as family members Drawing on a diverse range of case studies Animals in Person attempts to unravel our close and fascinating link with the animal kingdom This book highlights the theme of cross species intimacy in contexts such as livestock care pet keeping and the use of animals in tourism The studies draw on data from different parts of the world including New Guinea Nepal India Japan Greece Britain The Netherlands and Australia Animals in Person documents the existence of relations between humans and animals that in many respects recall relations among humans themselves

Domestic Animals, Humans, and Leisure

Janette Young,Neil Carr,2018-01-29 Domestic animals are an integral component of human leisure experience and can enhance the physical social and mental wellbeing of humans The interplay of human and animal experiences of justice wellbeing rights and roles within leisure is the central theme of this book Research explores the position of domesticated animals in human leisure experiences in a wide array of leisure settings Chapters question whether domestic animals may have a desire for leisure that is different from human leisure whether animals have and wish to fulfil needs for meaningful leisure or non leisure and whether human leisure needs and desires may coincide or contradict wellbeing interests of animals This book provides a venue for the dissemination and exploration of research which champions the welfare and rights of these animals to have their needs and interests in leisure recognised It moves the debate about animals in leisure beyond the current limits which have seen research mainly confined to the exotic other rather than more mundane everyday domestic animals This book will be of interest to individuals in the fields of tourism ethics zoology animal behaviour and leisure studies

Humans and Other Animals

Arien Mack,1999 Throughout history and in all places animals have been an essential part of human culture They have been hunted and domesticated studied and mythologized feared and loved Our complicated relationships with other animals have repeatedly found expression in art literature religion and science In 1995 the New School for Social Research sponsored a landmark conference to explore human animal interactions Published as a special issue of the journal Social Research under the title In the Company of Animals this collection is now available for the first time in a book edition

Good Natured Frans B. M. DE WAAL,F. B. M. de Waal,2009-06-30 To observe a dog s guilty look to witness a gorilla s self sacrifice for a wounded mate to watch an elephant herd s communal effort on behalf of a stranded calf to catch animals

in certain acts is to wonder what moves them Might there be a code of ethics in the animal kingdom Must an animal be human to be humane In this provocative book a renowned scientist takes on those who have declared ethics uniquely human Making a compelling case for a morality grounded in biology he shows how ethical behavior is as much a matter of evolution as any other trait in humans and animals alike World famous for his brilliant descriptions of Machiavellian power plays among chimpanzees the nastier side of animal life Frans de Waal here contends that animals have a nice side as well Making his case through vivid anecdotes drawn from his work with apes and monkeys and bolstered by the intriguing voluminous data from his and others ongoing research de Waal shows us that many of the building blocks of morality are natural they can be observed in other animals Through his eyes we see how not just primates but all kinds of animals from marine mammals to dogs respond to social rules help each other share food resolve conflict to mutual satisfaction even develop a crude sense of justice and fairness Natural selection may be harsh but it has produced highly successful species that survive through cooperation and mutual assistance De Waal identifies this paradox as the key to an evolutionary account of morality and demonstrates that human morality could never have developed without the foundation of fellow feeling our species shares with other animals As his work makes clear a morality grounded in biology leads to an entirely different conception of what it means to be human and humane **Interspecies Interactions** Sarah Cockram, Andrew Wells, 2017-09-14

Interspecies Interactions surveys the rapidly developing field of human animal relations from the late medieval and early modern eras through to the mid Victorian period By viewing animals as authentic and autonomous historical agents who had a real impact on the world around them this book concentrates on an under examined but crucial aspect of the human animal relationship interaction Each chapter provides scholarly debate on the methods and challenges of the study of interspecies interactions and together they offer an insight into the part that humans and animals have played in shaping each other's lives as well as encouraging reflection on the directions that human animal relations may yet take Beginning with an exploration of Samuel Pepys often emotional relationships with the many animals that he knew the chapters cover a wide range of domestic working and wild animals and include case studies on carnival animals cattle dogs horses apes snakes sharks and invertebrates These case studies of human animal interactions are further brought to life through visual representation by the inclusion of over 20 images within the book From sleeve cats to lion fights Interspecies Interactions encompasses a broad spectrum of relationships between humans and animals Covering topics such as use emotion cognition empire status and performance across several centuries and continents it is essential reading for all students and scholars of historical animal studies **Exploration in Animals and Humans** John Archer, Lynda I. A. Birke, 1983 **Animals In Human Society** Daniel Moorehead, 2015-11-03 Including the work of 12 authors from institutions such as Colorado State University Frostburg State University Michigan State University Salisbury University Texas Woman's University University of Birmingham University of California Irvine University of California Merced and William Jessup University Rocklin California

the collection of essays explores the broad range of animals who share our planet and attempts to recognize our responsibility as humans to take their interests seriously **Companion Animals and Us** Anthony L. Podberscek,Elizabeth S. Paul,James A. Serpell,2000-04-13 Over the past 30 years there has been a tremendous growth in interest in the multidisciplinary field of human companion animal interactions and relationships This is not surprising considering that pets are kept in at least half of the households in Western societies What then is so special about the relationships people have with their pets Are we very different from our ancestors in the ways we feel about animals What does pet keeping tell us about ourselves and our relationships with people Can pets be good for our health Do they help promote empathy for other humans These questions and more are explored in this book Companion Animals and Us brings together some of the newest research from a wide variety of disciplines including anthropology history psychology sociology human and veterinary medicine This book will make fascinating reading for anyone interested in understanding more about the human pet relationship *An Introduction to Human-Animal Relationships* Clive R. Hollin,2021-05-09 An Introduction to Human Animal Relationships is a comprehensive introduction to the field of human animal interaction from a psychological perspective across a wide range of themes Hollin examines the topic of the relationships between humans and animals as seen in owning a companion animal alongside more indirect relationships such as our approaches to eating meat The core issues under discussion include the moral and ethical issues raised in using animals for entertainment in therapy to keep us safe and in sports such as horse racing The justifications for hunting and killing animals as sport and using animals in scientific experimentation are considered The closing chapter looks to the future and considers how conservation and climate change may influence human animal relationships This key text brings an important perspective to the field of human animal studies and will be useful to students and scholars in the fields of psychology sociology animal welfare anthrozoology veterinary science and zoology **Animals** Peter Adamson,G. Fay Edwards,2018-05-10 Philosophical controversy over non human animals extends further back than many realize before Utilitarianism and Darwinism to the very genesis of philosophy This volume examines the richness and complexity of that long history Twelve essays trace the significance of animals from Greek and Indian antiquity through the Islamic and Latin medieval traditions to Renaissance and early modern thought ending with contemporary notions about animals Two main questions emerge throughout the volume what capacities can be ascribed to animals and how should we treat them Notoriously ungenerous attitudes towards animals mental lives and ethics status found for instance in Aristotle and Descartes are shown to have been more nuanced than often supposed while remarkable defenses of benevolence towards animals are unearthed in late antiquity India the Islamic world and Kant Other chapters examine cannibalism and vegetarianism in Renaissance thought and the scientific testing of animals A series of interdisciplinary reflections sheds further light on human attitudes towards animals looking at their depiction in visual artworks from China Africa and Europe as well as the rich tradition of animal fables beginning with Aesop **Humans and**

Animals Connie L. Johnston,Julie Urbanik,2023 An engaging and at times sobering look at the coexistence of humans and animals in the 21st century and how their sometimes disparate needs affect environments politics economies and culture worldwide There is an urgent need to understand human animal interactions and relations as we become increasingly aware of our devastating impact on the natural resources needed for the survival of all animal species This timely reference explores such topics as climate change and biodiversity the impact of animal domestication and industrial farming on local and global ecosystems and the impact of human consumption of wild species for food entertainment medicine and social status This volume also explores the role of pets in our lives advocacy movements on behalf of animals and the role of animals in art and media culture Authors Julie Urbanik and Connie L Johnston introduce the concept of animal geography present different aspects of human animal relationships worldwide and highlight the importance of examining these interconnections Alphabetical entries illustrate key relationships concepts practices and animal species The book concludes with a comprehensive appendix of select excerpts from key primary source documents relating to animals and a glossary
