Michael E. Cadrecha

Back To Earth Tomorrows Environmentalism:

Back to Earth Anthony Weston, 1994 In the face of our receding connection to nature and the loss of our direct experience of the world this book proposes a different kind of environmentalism It argues that we must restore our link with the more than human world bringing wilderness animals and the Earth closer to individuals and into daily life

Environmental Education, Ethics & Action Bob Jickling, 2006 This book objectively challenges the link between ethics and our everyday activities It takes ethics out of philosophy departments and puts it squarely onto the streets into the villages towns and cities and connects ethics to all life on Earth The book s primary audience is teacher trainers college instructors university professors and others responsible for professional development in education It is also aimed at environmental educators who want to take their teaching more deeply into the questions that lie at the heart of sustainable living Pub desc

International Handbook of Research on Environmental Education Robert B. Stevenson, Michael Brody, Justin Dillon, Arjen E.J. Wals, 2013-05-02 The environment and contested notions of sustainability are increasingly topics of public interest political debate and legislation across the world Environmental education journals now publish research from a wide variety of methodological traditions that show linkages between the environment health development and education The growth in scholarship makes this an opportune time to review and synthesize the knowledge base of the environmental education EE field The purpose of this 51 chapter handbook is not only to illuminate the most important concepts findings and theories that have been developed by EE research but also to critically examine the historical progression of the field its current debates and controversies what is still missing from the EE research agenda and where that agenda might be headed Published for the American Educational Research Association AERA **The Oxford**

Handbook of Comparative Environmental Law Emma Lees, Jorge E. Viñuales, 2019 This Handbook brings together the foremost authorities from around the world to provide the first comprehensive account of comparative environmental law It examines in detail the methodological foundations of the discipline as well as the substance of environmental law across countries

Environmental Ethics Bob Jickling, Heila Lotz-Sisitka, Lausanne Olvitt, Rob O'Donoghue, Ingrid Schudel, Dylan McGarry, Blair Niblett, 2021-12-07 This well constructed and highly original sourcebook integrates educational materials for teaching environmental ethics with theoretical reflections The book is set to contribute immensely to its aim of taking ethics out of philosophy departments and putting it into the streets into villages and on the Earth to make ethics an everyday activity not something left to experts and specialists Context based activities are presented in almost every chapter While it acknowledges foundational theories in environmental ethics and the work that they continue to do it wholeheartedly embraces a growing body of literature that emphasises contextual process oriented and place based approaches to ethical reflection deliberation and action It walks on the ground and isn t afraid to get a little dirty or to seek joy in earthly relationships And it ultimately breaks with much Western academic tradition by framing ethics in a storied world thus

making room to move beyond Euro American perspectives in environmental issues This work will be of interest to school teachers and other non formal and informal educators teacher educators college instructors university professors and other professionals who wish to bring environmental ethics to the forefront of their pedagogical practices Environmental Ethics

,2003 **Terra Nova** ,1996 **Connection on the Ice** Patti H. Clayton,1995 **Dirty Virtues** Louke Van

Wensveen,2000 Review Dirty Virtues is a study of ecological virtue ethics Based on a wide ranging survey of environmental literature it offers an overview of current green virtue language dubbed dirty virtues as well as the basic elements of a matching ecological virtue theory Highlighting the integrity diversity internal tensions dynamism and visionary character of this ecological virtue language Louke van Wensveen shows both its historical roots and innovative features She includes a unique catalog of 189 virtues and 174 vices that mark the vision and praxis of people committed to ecological flourishing Jacket **People, Penguins, and Plastic Trees** Christine Pierce,Donald VanDeVeer,1995 Stressing the importance of

understanding the grounds and the consequences of ethical or normative decision making this collection of classic essays compiled by Pierce and VanDeVeer examines disputes surrounding animals ecosystems the land and their own proper place in the ongoing network of lives on this planet A central question is how can we live lives that are both personally satisfying but which are also ecologically sound and responsible **Dialectics of Dissociation** Kenneth Andrew Worthy,2005

Evolution, Animal 'rights' & the Environment James B. Reichmann,2000 Among the more significant developments of the twentieth century the widespread attention given to rights issues must surely justify ranking it somewhere near the top Never before has the issue of rights attracted such a wide audience or stirred so much controversy Until very recently rights were traditionally recognized as attributable only to humans Today we increasingly are hearing a call to extend rights to the nonhuman animal and on occasion to the environment In this book James B Reichmann S J undertakes an investigation of the metaethical grounds of rights theory with special focus on the controversial issue of whether creatures other than humans can and should be considered true subjects of rights He contends that before assigning rights to this or that individual or group whether human or not we need to be very clear about what it is we are assigning to whom and why The book argues forcefully that the various recent efforts to build a case supporting animal and environmental rights fail in their quest and that any such effort resting on a Darwinian evolutionary base is likewise condemned to fail In furtherance of this claim the author first investigates life phenomena followed by a detailed comparative study of knowing communicating and doing as these are observed in the human and the nonhuman animal This in turn is followed by an overview of diverse views advanced by contemporary environmental ethicists and animal rights advocates including Peter Singer Tom Regan J Baird Callicott Laura Westra and Don E Marietta Jr Representative though doubtless provocative conclusions drawn from this study include the claims that 1 Classic Darwinian theory provides no admissible premise from which to derive a theory of inherent inalienable rights 2 No satisfactory explanation of the origin of rights and obligation can derive save from within the context

of natural law theory 3 The human person alone unqualifiedly possesses rights 4 The view that vegetarianism is an ethical mandate is neither compatible with the Christian world view nor philosophically sound ABOUT THE AUTHOR James B Reichmann S J is professor emeritus of philosophy at Seattle University where he continues to teach **Environment & Planning** ,1995 **Environmental Citizenship** Andrew Dobson,Derek Bell,2006 With a multidisciplinary perspective this book considers the theory and practice of environmental citizenship the obstacles to its realization and the opportunities it presents for bringing about environmental and social sustainability *Canadian Journal of Environmental Education* ,1996

Philosophy of Education Philosophy of Education Society (U.S.),2002 **Architecture and the Ethics of Form** Michael E. Cadrecha,1997 **In the Socratic Tradition** Tziporah Kasachkoff,1998 Twenty seven essays explore how to teach a variety of subjects in philosophy General topics such as teaching introductory courses improving students comprehension of philosophy texts and improving student papers are examined Specific fields such as the study of ethics aesthetics philosophy of religion and the history of philosophy are accorded separate sections and strategies for explaining specific philosophers including Kant Hegel and Nietzsche are discussed All of the papers in this volume appeared in the same or in an earlier version in the American Philosophical Association Newsletter on Teaching Philosophy between 1986 and 1994 Annotation copyrighted by Book News Inc Portland OR *New Titles in Bioethics* ,1997 **Bibliografisch repertorium van de wijsbegeerte** ,2000
