If you've just bought a Nexus 5 smartphone or you're thinking about buying one you should read this book. The ethos of the book is very much 'What the Nexus 5 can do for you' and it's an unofficial book because we have not colluded with the manufacturers Google or LG during the writing of the book so we can say pretty much whatever we want. And if we say we like it it's because we really do. But we're no fan boys so we don't mind giving awarts'n all coverage where it's warranted. So whether you're so far undecided or have already purchased your Nexus 5 buy this book. Now in its Second Edition the first edition of this book attracted the following praise: I gave it five stars because it is full of information that I never expected to exist. I found the book concise and structured in a way that made it easy for me to get the information I needed. Easy to read, well illustrated, can't say much more than that. Worth the price. Grandsons were waiting for a help call but I could manage without them for a change. Book is clear and very helpful indeed. A very helpful guide to get to grips with the Nexus 5. Very helpful information in one place. Well worthwhile. Very useful book. Well written with lots of answers if you get stuck. Recommended for those of us who find technology rather baffling. **Android** Alex Cox, 2014
