- Margin**: Clears an area outside the border.

JavaScript Questions

What is the difference between var, let and const

Answer var: Function scoped and can be re-declared and updated. let: Block scoped and can be updated but not re-declared within the same scope. const: Block scoped and cannot be updated or re-declared.

Explain event delegation in JavaScript

Answer Event delegation is a technique where a single event listener is added to a parent element to manage events for multiple child elements. This is efficient because it reduces the number of event listeners attached to the DOM.

Framework Library Questions

What are the key features of React

Answer JSX: A syntax extension that allows mixing HTML with JavaScript.

Virtual DOM: Improves performance by minimizing direct DOM manipulations.

Components: Building blocks of a React application that encapsulate the rendering logic.

State and Props: State for dynamic data management within components and props for passing data between components.

What is the difference between Angular and React

Answer Angular: A full-fledged MVC framework developed by Google. It uses TypeScript and has a steep learning curve with features like dependency injection, two-way data binding, and a comprehensive CLI.

React: A library developed by Facebook for building UI components. It uses JavaScript or TypeScript and is focused on the view layer, promoting a unidirectional data flow and utilizing a virtual DOM for performance.
