**TASER® Conducted Electrical Weapons: Physiology, Pathology, and Law** Mark W. Kroll,Jeffrey D. Ho,2009-02-27

TASER Conducted Electrical Weapons are rapidly replacing the club for law enforcement control of violent subjects within many countries around the globe A TASER CEW is a hand held device that delivers a 400 volt pulse with a duration tuned to control the skeletal muscles without affecting the heart at a distance of up to 6 5 meters over tiny wires If necessary it begins with an arcing voltage of 50 000 V to penetrate thick clothing the 50 000 V is never delivered to the body itself Due to the widespread usage of these devices and the widespread misconceptions surrounding their operation this book will have significant utility This volume is written for cardiologists emergency physicians pathologists law enforcement management corrections personnel and attorneys

**Clinical Forensic Medicine** Margaret M. Stark,2011-09-22

The publication of this third edition of the definitive text on clinical forensic medicine comes at an exciting time for a subject now gaining recognition as a speciality in the medical establishment This growing acknowledgement reflects the fact that increasing numbers of health professionals are becoming engaged in general forensic services Nurses and paramedics are more involved than ever in custody care while nurses themselves are conducting more examinations in cases involving alleged sexual offences Thus it is vital that those caring for this vulnerable group of patients whether detainees or complainants have the tools to master this

specialist set of skills All the chapters in this new edition have been fully updated with some undergoing extensive revision Recent developments in child protection protocols have prompted a major rewrite of the chapter on non accidental injury and the text now includes a specific chapter on the use of the TASER Other aspects of restraint are now dealt with separately The material on care of detainees and fitness for interview has been split into individual chapters to allow a more comprehensive discussion of the issues In addition new authors have joined the team of contributors facilitating a wider range of international perspectives From its chapters on the history and core principles of clinical forensic medicine right up to the text's discussion of substance misuse and deaths in custody this volume remains the gold standard source for health professionals whose working lives bring them into contact with those in the law enforcement arena

### **Police Body-Worn**

**Cameras** Christopher J. Schneider, Erick Laming, 2026-01-22 Focusing on discourses surrounding the introduction and use of body worn cameras this book contends that the principal catalyst for equipping frontline officers with cameras is linked to media narratives concerning beliefs about their effectiveness in bringing about police reform Although research testing the efficacy of body cameras is inconsistent law enforcement agencies continue to adopt and use body worn cameras on the premise that the technology will increase and enhance accountability and transparency The authors argue that the police and public do not have shared definitions or expectations associated with the terms accountability and transparency but that these ideas appear frequently across media narratives in relation to police reform Police Body-Worn Cameras Media and the New Discourse of Police Reform details how the new discourse obfuscates the clashing expectations and goals of police and publics ensuring that transparency and accountability remain aspirational public concepts with no enshrined legal or policy parameters that bolster the legitimacy of policing as an institution This book will appeal to scholars and students of criminology sociology media studies and policing

### **Electrostimulation** J. Patrick Reilly, Alan M. Diamant, 2011

**Electric-Shock Weapons, Tasers and Policing** Abi Dymond, 2021-10-24 Building on five years of research and drawing

on criminology science and technology studies STS socio legal studies and social psychology this book is the first non medical book written on electric shock weapons of which the best well known is the TASER brand The police s ability to use force is one of their most crucial powers yet one that has been relatively neglected by criminology This book challenges some of the myths surrounding the use of these weapons and considers their human rights implications and impact on members of the public and officers alike Drawing on STS it also considers the role and impact of electric shock technologies examines the extent to which technologies and non human agency may also play a role in shaping officer decision making and discretion and contributes to long standing debates about police accountability This is essential reading for policing scholars around the world particularly those engaged with use of force culture and accountability as well as those engaged with Science and Technology studies     [Alberta Law Review](#) ,2011
