## Abece De Micrologias:

**The Age of Curiosity** Simone Broders, 2021-05-10 Challenging the success story of curiosity from original sin to intellectual virtue this study uses an innovative methodological approach to the history of ideas as a non teleological neural network based on current research in information technology and neurophysiology The network offers a dynamic alternative to the development of curiosity within the progress oriented mythology of the Enlightenment emphasizing the oscillation and interaction of ideas within the processes of their construction as well as exposing the power relations behind them The text corpus focuses on enactments of curiosity in English literature of the Long Eighteenth Century c 1680 1818 such as transgression of boundaries breach of taboo gendered curiosity sensationalism or academic endeavour bringing together a variety of examples from all major genres The Age of Curiosity contributes to current debates on a post Foucauldian renewal of Lovejoy's history of ideas in Enlightenment studies exploring both curiosity as an indispensable trait for the search of answers to the fundamental yet unresolved questions of identity or truth and its potential as *cura* the care for others and the world
