**Accessing Capital Markets through Securitization** Frank J. Fabozzi, 2001-05-02 This innovative collection written by securitization professionals and edited by finance guru Frank Fabozzi thoroughly explains the basics and the mechanics of securitization and shows how securitization can help more institutions offer innovative fixed income products. Further it discusses the effects of the capital markets on securitization and helps financial professionals decide whether or not to securitize. Filled with strategies and techniques financial professionals will learn how to use float asset backed offerings and how to hedge against risk and default.

**Where Credit is Due** John Powell, Christy Rogers, 2013-11-21 While much recent attention has been focused on the subprime lending and foreclosure crisis little has been said about its radically disparate impact. Drawing upon history as well as insight into the current crisis this book shows that this crisis is not an anomaly especially for people of color nor is it over. People of color have been excluded from wealth building opportunities via homeownership continuously throughout United States history from the outright denial of credit and residential racial discrimination to federally sponsored urban renewal programs. The subprime lending and foreclosure crisis is predicted to strip a quarter of a trillion dollars in wealth from black and Latino homeowners. It has reversed home ownership gains for people of color and has decimated neighborhoods across the United States while impacting local, regional, national and international economies. The consequences are devastating. This collection of essays provides a framework for creating equitable policy and ultimately building more stable communities for all Americans.

**Capital Markets** K. Thomas Liaw, 2004 Capital Markets 1e provides coverage of global financial markets and institutions with a focus on globalization, deregulation, consolidation and technology. The book is distinguished by its focused coverage of global markets, greater coverage of securities markets and emphasis on modern topics and market practice. It is also unique in its inclusion of an entire section on Global Financial Centers including chapters on Euromarkets, European Economic and Monetary Union, Japanese Capital Markets, Asian and Russian Markets and Latin American Markets.
