Accession Of China To The Wto:

Handbook On China's Wto Accession And Its Impacts Cheong Ching, Hung-yee Ching, 2003-06-20 It has taken China 15 long years of tough negotiations to achieve accession to the World Trade Organization WTO By becoming a full member of the WTO China has in fact made three tiers of commitments The first tier is the commitment to the objectives of the WTO such as free trade most favoured nations national treatment and transparency as expounded in the various documents setting up the organization and its predecessor the GATT The second tier is the commitment to the set of rules governing trade for specific sectors such as agricultural and textile goods or information technology and telecommunications This is set out in China's accession protocol The third tier is the commitment to bilateral agreements which China signed with her major trading partners Their support is mandatory before China can be admitted to the WTO and therefore she has to satisfy each of them through elaborate bilateral negotiations This handbook highlights the important commitments that China has made to the international community and analyzes the potential impact of such commitments on China Part I of the book outlines China's commitments to convert her economy from a centrally planned one to a free market one as far as cross border movement of goods services and personnel is concerned It reproduces China's commitments in a tabular format to facilitate reading and is supplemented with brief references to WTO regulations where appropriate so that readers get to know how China's commitments relate to WTO obligations Part II examines the impacts of China's WTO membership as a whole and on her specific economic sectors Part III consists of Tables and Figures selected from a Report compiled by the US General Accounting Office presenting some of the Office's analysis and findings of China's commitments on WTO accession Appendix 1 lists all the legal instruments pertaining to China's accession to the WTO Appendix 2 reprints the Protocol of China's Accession China's schedule of commitments on services rearranged in a format more comprehensible to the general reader is included as Appendix 3 so that concerned readers can find out for themselves how their professions may be affected Appendix 4 reprints the GATS Services Sectoral Classification GNS W 120 and part of the CPC Provisional version This appendix is attached to facilitate readers to check whether their specific professions which are spelt out in 3 6 digit codes are included in Chinese commitments

The difficulties surrounding China's accession to the World Trade

Organisation, and the likely impacts on China's economy in post-WTO China Ben Beiske, 2003-07-17 Seminar paper from the year 2003 in the subject Politics Topic International Organisations grade 1 6 A University of Manchester Manchester School of Management course Manchester School of Management language English abstract What were the difficulties surrounding China's accession to the World Trade Organisation WTO Why has it taken the People's Republic of China PRC over 15 years to join What are the expected benefits and disadvantages of joining What changes is WTO membership likely to bring to China's economy in the future These are the questions this paper will address WTO accession by China is often seen as the most significant event about China in the last decade even ahead of the Taiwan Independence

issue which continues to penetrate world news periodically Since the end of the Cultural Revolution in 1978 China has been on a course of economic reform Today Chinese are richer than ever before in history with the country itself having experienced extended periods of extraordinary growth Specifically this report will highlight China's first attempts to join the WTO more than 15 years ago in chapter two Chapter three will focus on the main areas of difficulty surrounding WTO accession while chapter four will comment on the final accession in December 2001 The expected economic advantages and disadvantages for China will be discussed in chapter five finally chapter six will offer a brief future outlook for China again mainly from an economic perspective *China and the WTO* Deepak Bhattachali, Shantong Li, William J. Martin, 2004-07-09

China's accession to the WTO requires a great many specific policy reforms However if the best results are to be obtained it is important that these reforms be implemented as part of a consistent development program rather than simply by treating them as a recipe To do this policy makers must understand the range and nature of the policy changes required by accession their implications for the economy and the availability and effects of supporting policies China and the WTO analyzes the nature of the reforms involved in China's accession to the WTO assesses their implications for the world economy and examines the implications for individual households particularly the poor Its key objective is to provide the information that will allow policy makers to implement WTO commitments and formulate supporting policies to contribute strongly to economic development and poverty reduction Individual chapters by leading scholars analyze the nature of the reforms in key areas such as agriculture services intellectual property and safeguards and anti dumping These chapters form the building blocks for later chapters which analyze the implications of reform for the economy The book also includes a series of studies that assess the implications for households taking into account the social safety net policies applying in China and the impacts of complementary policies in areas such as labor market reform and investments in human capital Of interest to policymakers academics and students studying international trade issues and to practitioners in the area of trade and development China and the WTO is a valuable addition to the wealth of information provided by the World Bank Trade and Development Series *China and the WTO* Esther Lam, 2009-10-08

Joining the World Trade Organization WTO enables China to reform its legal order and to move towards a system incorporating major principles of the rule of law The WTO also serves as an external impetus that guides contemporary Chinese legal reform and orients it in ways that domestic forces alone could not achieve and sustain Much discussion on the WTO and the Chinese legal system has focused on the issue of compliance whether the Chinese legal system has the capacity to fulfill China's WTO accession commitments The focus of this work is less concerned with compliance issues per se but rather with the extent to which the WTO's requirements vis vis China actually affect the Chinese legal system The fine difference between the two approaches lies in the fact that efforts by the Chinese government to meet its WTO obligations necessarily impact the Chinese legal order and its way of functioning even if their end results may or may not lead to full compliance with what is required of it by the WTO This timely work

exposes many behind the scene dealings and relies on valuable information that is not publicly available Not only does it preserve for the historical record important details of the Chinese WTO accession it also sheds light on the travaux préparatoires of China's accession agreement and the negotiation history of important issues some of which remain relevant and highly contentious today As expressed by WTO Director General Pascal Lamy in his foreword to the book through this work Esther Lam succeeds in demonstrating how WTO membership can benefit both the acceding country and the wider WTO family of nations

China and the WTO - A Critical Analysis Junzhai Ma, 2012-11-30 Diploma Thesis from the year 2007 in the subject Economics Case Scenarios grade 2.0 University of Tübingen language English abstract This paper gives an analysis of China's entry process into the WTO and an assessment on China's accession commitment The most important aspect of China's performance and implementation is then analysed The paper researches the impact that the WTO membership has brought to China and the world The impact on rule of law is researched and the impact on trade growth as well as employment are analysed

China's Accession to the World Trade Organization, **China and the WTO** Supachai Panitchpakdi, Mark L. Clifford, 2002-01-25 This work analyses the implications for world trade of China's entry into the World Trade Organization It has taken fifteen long years of dialogue and heated debate and it will take its place among the other members at the end of 2001 This momentous event is relayed by the next WTO Chairman

The Politics of China's Accession to the World Trade Organization Hui Feng, 2006-01-16 Grounded on a series of first hand interviews with Chinese government officials this book examines China's accession to the World Trade Organization providing an inside look at Chinese WTO accession negotiations Presenting a systematic political economy model in analyzing Beijing's decision making mechanisms the book argues that China's WTO policy making is a state led leadership driven and top down process Feng explores how China's determined political elite partly bypassed and partly restructured a largely reluctant and resistant bureaucracy under constant pressure from an increasingly globalized international system By addressing China's accession to the WTO from a political analysis perspective the book provides a theoretically informed and intriguing examination of China's foreign economic policy making regime The book highlights contemporary debates relating to state and institutionalist theory and provides new and useful insights into a significant development of this century

Economic Impacts of China's Accession to the World Trade Organization Elena Ianchovichina, Will Martin, 2003 Abstract 1 billion and trade reforms after accession will lead to additional gains of around Ianchovichina and Martin present estimates of the impact of accession by China and Chinese Taipei to the World Trade Organization China is estimated to be the biggest beneficiary followed by Chinese Taipei and their major trading partners Accession will boost the labor intensive manufacturing sectors in China especially the textiles and apparel sector that will benefit directly from the removal of quotas on textiles and apparel exports to North America and Western Europe Consequently developing economies competing with China in third markets may suffer

relatively small losses China has already benefited from the reforms undertaken between 1995 and 2001 US **The Impact of China's WTO Accession on East Asia** Elena Ianchovichina, Terrie Louise Walmsley, 2003 Abstract China's World Trade Organization WTO accession will have major implications for China and present both opportunities and challenges for East Asia Ianchovichina and Walmsley assess the possible channels through which China's accession to the WTO could affect East Asia and quantify these effects using a dynamic computable general equilibrium model China will be the biggest beneficiary of accession followed by the industrial and newly industrializing economies NIEs in East Asia But their benefits are small relative to the size of their economies and to the vigorous growth projected to occur in the region over the next 10 years By contrast developing countries in East Asia are expected to incur small declines in real GDP and welfare as a result of China's accession mainly because with the elimination of quotas on Chinese textile and apparel exports to industrial countries China will become a formidable competitor in areas in which these countries have comparative advantage With WTO accession China will increase its demand for petrochemicals electronics machinery and equipment from Japan and the NIEs and farm timber energy products and other manufactures from the developing countries in East Asia New foreign investment is likely to flow into these expanding sectors The overall impact on foreign investment is likely to be positive in the NIEs but negative for the less developed East Asian countries as a result of the contraction of these economies textile and apparel sector As China becomes a more efficient supplier of services or a more efficient producer of high end manufactures its comparative advantage will shift into higher end products This is good news for the poor developing economies in East Asia but it implies that the impact of China's WTO accession on the NIEs may change to include heightened competition in global markets This paper a product of the Economic Policy Division Poverty Reduction and Economic Management Network is part of a larger effort in the network to assess the impact of China's WTO accession **Agriculture and Food Security in China** Chunlai Chen, Ron Duncan, 2008-06-01 China's accession to the World Trade Organization WTO has had profound consequences for the structure of its economy and there will many more before the full benefits of an open trading regime will be realised **AGRICULTURE AND FOOD SECURITY IN CHINA** explains the background to China's WTO accession and links accession to reforms beginning as far back as 1979 The book highlights China's policymakers decision to move away from protectionism and grain self sufficiency and illustrates how China's step away from direct participation in the agricultural sector to indirect regulatory involvement and liberalisation could encourage further economic growth Yet not all economic growth is cost free **AGRICULTURE AND FOOD SECURITY IN CHINA** explores the short term impacts of WTO accession as well as the mid and long term implications of greater market involvement at an economy wide and regional level Growing divides between coastal and inland regions and differences in rural and urban growth will require a better understanding of the consequences of greater market dependency **AGRICULTURE AND FOOD SECURITY IN CHINA** adds to the existing knowledge of China's agricultural growth as well as the impacts and interrelationships between WTO accession and China's participation in other

regional free trade agreements The Impact of China's WTO Accession on East Asia Elena Ianchovichina, 2016 China's World Trade Organization WTO accession will have major implications for China and present both opportunities and challenges for East Asia Ianchovichina and Walmsley assess the possible channels through which China's accession to the WTO could affect East Asia and quantify these effects using a dynamic computable general equilibrium model China will be the biggest beneficiary of accession followed by the industrial and newly industrializing economies NIEs in East Asia But their benefits are small relative to the size of their economies and to the vigorous growth projected to occur in the region over the next 10 years By contrast developing countries in East Asia are expected to incur small declines in real GDP and welfare as a result of China's accession mainly because with the elimination of quotas on Chinese textile and apparel exports to industrial countries China will become a formidable competitor in areas in which these countries have comparative advantage With WTO accession China will increase its demand for petrochemicals electronics machinery and equipment from Japan and the NIEs and farm timber energy products and other manufactures from the developing countries in East Asia New foreign investment is likely to flow into these expanding sectors The overall impact on foreign investment is likely to be positive in the NIEs but negative for the less developed East Asian countries as a result of the contraction of these economies textile and apparel sector As China becomes a more efficient supplier of services or a more efficient producer of high end manufactures its comparative advantage will shift into higher end products This is good news for the poor developing economies in East Asia but it implies that the impact of China's WTO accession on the NIEs may change to include heightened competition in global markets This paper a product of the Economic Policy Division Poverty Reduction and Economic Management Network is part of a larger effort in the network to assess the impact of China's WTO accession

The Employment Impact of China's WTO Accession A. S. Bhalla, Shufang Qiu, S. Qiu, 2003-11-20 The book explores the macroeconomic and sectoral employment implications in agriculture industry and services of China's World Trade Organisation accession It argues that while short run employment losses may occur in the longer term China will be able to generate additional employment particularly in the tertiary sectors and that it can maintain its comparative advantage in labour intensive exports by relocating production from high cost coastal areas to the hinterland with abundant supply of cheap labour It also argues that although China is likely to benefit in the long run in the short and medium term China is likely to face enormous problems including increased unemployment as weaker links cease to be protected by tariffs and the problem of restructuring state owned enterprises
