The New Russian Book Birgitte Beck Pristed,2017-08-01 This book takes up the obtrusive problem of visual representation of fiction in contemporary Russian book design By analyzing a broad variety of book covers the study offers an absolutely unique material that illustrates a radically changing notion of literature in the transformation of Soviet print culture to a post Soviet book market It delivers a profound and critical exploration of Russian visual imaginary of classic popular and contemporary prose Among all the carelessly bungled covers of mass published post Soviet series the study identifies gems from experimental designers By taking a comparative approach to the clash of two formerly separate book cultures the Western and the Soviet that results both in a mixture of highbrow and lowbrow forms and in ideological re interpretations of the literary works this book contributes to opening an East West dialogue between the fields of Russian studies contemporary book and media history art design and visual studies

Queering Translation History Eva Spišiaková,2021-06-29 This innovative work challenges normative binaries in contemporary translation studies and applies

frameworks from queer historiography to the discipline in order to explore shifting perceptions of same sex love and desire in translations and retranslations of William Shakespeare's Sonnets. The book brings together perspectives from poststructuralism, queer theory, and translation history to set the stage for an in-depth exploration of a series of retranslations of the Sonnets from the Czech Republic and Slovakia. The complex and poetic language of the Sonnets, frequently built around era-specific idioms and allusions, has produced a number of different interpretations of the work over the centuries, but questions remain as to how the translation process may omit, retain, or enhance elements of same sex love in retranslated works across time and geographical borders. In focusing on target cultures which experienced dramatic sociopolitical changes over the course of the twentieth century and comparing retranslations originating from these contexts, Spišiakov finds the ideal backdrop in which to draw parallels between changing developments in power and social structures and shifting translation strategies related to the representation of gender identities and sexual orientations beyond what is perceived to be normative. In so doing, the book advocates for a queer perspective on the study of translation history and encourages questioning traditional boundaries prevalent in the discipline, making this key reading for students and researchers in translation studies, queer theory, and gender studies, as well as those interested in historical developments in Central and Eastern Europe. Excerpt from *The Socialist Appeal*. Prose Passages Which Voice the Call for a New Social Order. The workingman has a right to live, but he has not a right to the means by which he can live. He can not live without work, yet ever he must seek work as a privilege, not as a right. The coming of the age of machinery has made it impossible to work without machinery. Yet the worker owns no machinery and can get access to no machinery except upon such terms as he may be able to make with its owners.
