The Global Commercial Aviation Industry Sören Eriksson,Harm-Jan Steenhuis,2015-07-16 This book provides a state of the art overview of the changes and development of the civil international aircraft aviation industry It offers a fully up to date account of the international developments and structure in the aircraft and aviation industries from a number of perspectives which include economic geographical political and technological points of view The aircraft industry is characterized by very complex high technology products produced in relatively small quantities The high technology requirements necessitate a high level of R D In no other industry is it more of inter dependence and cross fertilisation of advanced technology

Consequently most of the world's large aircraft companies and technology leaders have been located in Europe and North America. During the last few decades many developing countries have tried to build up an internationally competitive aircraft industry. The authors study a number of important issues including the political economy of the aircraft industry, globalization in this industry, innovation, newly industrializing economies and the aircraft industry. This book also explores regional and large aircraft transformation of the aviation industry in Central and Eastern Europe including engines, airlines, airports and airline safety. It will be of great value to students and to researchers seeking information on the aircraft industry and its development in different regions.

Advances in Aerospace Guidance, Navigation and Control Bogusław Dołęga, Robert Głębocki, Damian Kordos, Marcin Żugaj, 2017-12-15. The first three CEAS Councils of European Aerospace Societies Specialist Conferences on Guidance, Navigation and Control (CEAS EuroGNC) were held in Munich, Germany in 2011, in Delft, Netherlands in 2013 and in Toulouse, France in 2017. The Warsaw University of Technology (WUT) and the Rzeszow University of Technology (RzUT) accepted the challenge of jointly organizing the 4th edition. The conference aims to promote scientific and technical excellence in the fields of Guidance, Navigation and Control (GNC) in aerospace and other fields of technology.

The Conference joins together the industry with the academia research. This book covers four main topics: Guidance and Control, Control Theory, Application, Navigation, UAV Control and Dynamic. The papers included focus on the most advanced and actual topics in guidance, navigation and control research areas: Control theory, analysis and design, Novel navigation, estimation and tracking methods, Aircraft, spacecraft, missile and UAV guidance, navigation and control, Flight testing and experimental results, Intelligent control in aerospace applications, Aerospace robotics and unmanned autonomous systems, Sensor systems for guidance, navigation and control, Guidance, navigation and control concepts in air traffic control systems. For the 4th CEAS Specialist Conference on Guidance, Navigation and Control, the International Technical Committee established a formal review process. Each paper was reviewed in compliance with good journal practices by independent and anonymous reviewers. At the end of the review process, papers were selected for publication in this book.

Building the Information Society René Jacquart, 2008-04-08. In the context of the 18th IFIP World Computer Congress (WCC 04) and beside the traditional organization of conferences, workshops, tutorials and student forum, it was decided to identify a range of topics of dramatic interest for the building of the Information Society. This has been featured as the Topical day session track of the WCC 04. Topical Sessions have been selected in order to present syntheses, latest developments and/or challenges in different business and technical areas. Building the Information Society provides a deep perspective on domains including the semantic integration of heterogeneous data, virtual realities and new entertainment, fault tolerance for trustworthy and dependable information infrastructures, abstract interpretation and its use for verification of program properties, multimodal interaction, computer-aided inventing, emerging tools and techniques for avionics certification, bio-nano and information technologies, E-learning perspectives on ambient intelligence, the grand challenge of building a theory of the Railway domain.
