**Assessment of Disorders in Childhood and Adolescence, Fifth Edition** Eric A. Youngstrom, Mitchell J. Prinstein, Eric J. Mash, Russell A. Barkley, 2020-08-27 Now in its fifth edition this leading text and clinical guide offers best practice recommendations for assessing a comprehensive array of child and adolescent mental health problems and health risks. Leading authorities provide an overview of each disorder and describe methods and procedures that take into account the developmental, biological, familial, and cultural contexts of children's problems and that can inform sound clinical decision making. The fifth edition has been thoroughly updated with the growing knowledge base on child and family disorders and evidence-based assessment. *Assessing Adolescents in Educational, Counseling, and Other Settings* Robert D. Hoge, 1999-03 This book constitutes the first comprehensive guide to the psychological assessment of adolescents. Throughout the emphasis is on standardized instruments with known reliability and validity parameters. **The Oxford Handbook of Infant, Toddler, and Preschool Mental Health Assessment** Rebecca DelCarmen-Wiggins, Alice S. Carter, 2019-12-02 This fully updated new edition of *The Oxford Handbook of Infant Toddler and Preschool Mental Health Assessment* remains the leading reference for those seeking to understand and assess mental health in infants and young children. Detailing the latest empirical research on measures and methods of infant and young child assessment and providing clinically applicable information for practitioners, this handbook takes a closer look at current developmentally based conceptualizations of mental health function and dysfunction in infants and young children as well as current and new diagnostic criteria in specific disorders such as sensory modulation dysfunction, autism spectrum disorders, affective disorders, and post-traumatic stress disorder. Presented in four sections, chapters correspond to four broad themes: contextual factors in early assessment; temperament and regulation in assessment of young children; early problems and disorders; and translation and varied applied settings for assessment. Each chapter presents state-of-the-science information on valid developmentally based clinical assessment and makes recommendations based on developmental theory, empirical findings, and clinical experience. Chapters have been added to this second edition covering family assessment, early care and educational environments, new approaches for distinguishing temperament from psychopathology, assessing language and implementing second stage screening and referral. The volume recognizes and highlights the important role of developmental, social, and cultural contexts in approaching the challenge of assessing early problems and disorders. This new updated volume will be an ideal resource for teachers, researchers, and a wide variety of clinicians and trainees including child psychologists and psychiatrists, early interventionists, and early special educators.
