Special Technology Course, Student Training Manual and Textbook, Fleet Ballistic Missile Department, U.S. Naval Guided Missile School, Dam Neck, Virginia United States. Bureau of Naval Personnel, 1964 *The Oral History Manual* Barbara W. Sommer, Mary Kay Quinlan, 2018-07-05 The Oral History Manual is designed to help anyone interested in doing oral history research to think like an oral historian Recognizing that oral history is a research methodology the authors define oral history and then discuss the methodology in the context of the oral history life cycle the guiding steps that take a practitioner from idea through access use They examine how to articulate the purpose of an interview determine legal and ethical parameters identify narrators and interviewers choose equipment develop budgets and record keeping systems prepare for and record interviews care for interview materials and use the interview information In this third edition in addition to new information on methodology memory technology and legal options incorporated into each chapter a completely new chapter provides guidelines on how to analyze interview content for effective use of oral history interview information The Oral History Manual provides an updated and expanded road map and a solid introduction to oral history for all oral history practitioners from students to community and public historians *Manual of Chemical Technology* Johannes Rudolf Wagner, 1897 *Public Works Manual* , 1998 Equipment Manufacturing Technology Jing Tao Han, Si Hai Jiao, Zheng Yi Jiang, 2011-12-06 Selected peer reviewed papers from the Second International Conference on Advances in Materials and Manufacturing Processes ICAMMP 2011 December 16 18 2011 Guilin China *Rhetoric, Innovation, Technology* Stephen Doheny-Farina, 1992 Stephen Doheny Farina shows that the technical and commercial processes of turning technologies into products are in significant ways communication processes Improving the way that technology is transferred from laboratory to marketplace is central to improving American productivity and competitiveness in a global economy In this provocative analysis Stephen Doheny Farina shows that the technical and commercial processes of turning technologies into products are in significant ways communication processes He explores the key role that technical communicators must play in the movement of technology from expert designers and developers to users Several lengthy case studies illustrate the rhetorical issues involved in technology transfers as well as the rhetorical barriers to their success Doheny Farina argues that processes typically called information transfer and technology transfer are not transfers at all but instead are series of personal constructions and reconstructions of knowledge expertise and technologies by the participants attempting to adapt technological innovations for social uses Underscoring the rhetorical nature of any technology transfer the case studies describe the powerful effect that a startup company's business plan can have on its future including the many factors that surround the writing of a business plan the rhetorical barriers to the transfer of an experimental artificial heart from a university research hospital to a biomedical products manufacturer and two compelling situations that call for the inclusion of technical writers in new product development from its inception A final chapter focuses on the important

elements in the education of technical communicators and an appendix discusses classroom applications and includes a fictional case incorporating issues of intraorganizational barriers to collaboration in the new product development process
