brasileiras passaram a digitalizar os documentos dos cidadãos substituindo o antigo método de cédula física. Entretanto, atualmente é necessário que o cidadão se desloque até a instituição financeira para que o documento seja apresentado e autenticado, visto que não há via eletrônica que possibilite a instituição receber de maneira segura os dados do cidadão totalmente digital. Isso prejudica tanto o cidadão que necessita se deslocar até o local físico quanto para a empresa que necessita disponibilizar locais de atendimento e colaboradores para essa finalidade. Este livro traz a pesquisa feita em sites de empresas e governos para no final propor uma solução com desenhos dos fluxos dos processos atuais do governo brasileiro e, em seguida, a proposta de um novo fluxo definindo uma forma de integração entre os sistemas dos órgãos existentes e a preocupação em desenhar uma solução que seja escalável horizontalmente, visto que essa solução seria utilizada pela população brasileira. Para o desenho da solução feita uma divisão em três etapas: a primeira chamada de dados centralizados, a segunda chamada de Autenticador nacional e a terceira chamada de Solução da forma visual, chegando ao desafio proposto. As funcionalidades são descritas, desenvolvidas e testadas por meio de caso de uso e práticas como TDD e BDD, além de executações de testes integrados em laboratório, demonstrando seu funcionamento.
