traces the history of the intersections between nature economy and nation in the Spanish Caribbean through a history of the agricultural and botanical sciences Growers and governments in Venezuela Puerto Rico Cuba Colombia and Costa Rica turned to scientists to help them establish practical and ideological control over nature They hoped to use science to alleviate the pressing environmental and economic stresses without having to give up their commitment to export led growth Starting from an overview of the relationship among science nature and development throughout the export boom of 1760 to 1930 Stuart McCook examines such topics as the relationship between scientific plant surveys and nation building the development of a creole science to address the problems of tropical agriculture the ecological rationalization of the sugar industry and the growth of technocratic ideologies of science and progress He concludes with a look at how the Great Depression of the 1930s changed the paradigms of economic and political development and the role of science and nature in these paradigms **Zoology Reprints and Separata, Etc** ,1909 Catalog of the Cuban and Caribbean Library, University of Miami, Coral Gables, Florida University of Miami.
