SBAQs for the FRCEM Primary Pawan Gupta, 2018-09-13 SBAQs for the FRCEM Primary is a key resource for the new FRCEM Primary examination. Featuring over 450 Single Best Answer Questions, SBAQs mapped to the Royal College of Emergency Medicine curriculum, this comprehensive guide ensures high quality self-assessment. Each chapter focuses on key areas of emergency medicine that candidates will be tested on. All questions are supported by detailed answers and further reading to ensure quick identification of key areas that may need more attention. The last chapter features a mock examination of 100 SBAQs, ensuring the reader has not only the knowledge to pass the exam but can practice the technique and approach required for success in this exam. Edited by an experienced Consultant, SBAQs for the FRCEM Primary is essential reading for candidates preparing for the FRCEM Primary exam worldwide.

Introduction to Emergency Medicine Elizabeth Mitchell, Ron Medzon, 2005-01-01 This new text covers basic principles commonly found in the introduction to emergency medicine course. Comprised of five sections, diagnosis and management is presented from an emergency medicine perspective. Includes 75 case-based clinical vignettes to help students prepare for the course and clerkship as well as the USMLE. The common complaint section features a template covering differential history and physical pathophysiology and treatment of the given topics. Illustrations and line drawings supplement the text. Curricula objectives from the Society for Academic Emergency Medicine (SAEM) and the American College of Emergency Physicians (ACEP) are addressed.

Disaster Medicine David E. Hogan, Jonathan L. Burstein, 2007 Written by more than 30 emergency physicians with first-hand experience handling medical care during disasters, this volume is the only single comprehensive reference on disaster medicine. It provides the information that every emergency department needs to prepare for and handle the challenges of natural and manmade disasters. The contributors present guidelines for assessing the affected population's health care needs, establishing priorities, allocating resources, and treating individuals. Coverage encompasses a wide range of natural, industrial, technologic, transportation-related, and conflict-related disasters, with examples from around the world. This edition has more illustrations and more information on weapons of mass destruction and explosions.
