Advanced Research Methods In The Built Environment

Andrew Knight, Les Ruddock

Advanced Research Methods In The Built Environment:

Advanced Research Methods in the Built Environment Andrew Knight, Les Ruddock, 2009-03-16 This book provides a bridge between the introductory research methods books and the discipline specific higher level texts Its unique feature is the coverage of the detailed process of research rather than the findings of research projects Chapter authors have been carefully selected by their expertise discipline and location to give an eclectic range of perspectives Particular care has been taken to balance positivist with interpretivist approaches throughout The authors focus is on the practical consequences of research philosophies strategies and techniques by using their own research and by evaluating the work of others Advanced Research Methods in the Built Environment addresses common topics raised by postgraduate level researchers rather than dealing with all aspects of the research process Issues covered range from the practicalities of producing a journal article to the role of theory in research The material brought together here provides a valuable resource for the training and development of doctoral and young researchers and will contribute to a new sense of shared methodological understanding across built environment research

Research Methods in Building Science and Technology Rahman Azari, Hazem Rashed-Ali, 2021-09-09 This book covers the range of methodological approaches methods and tools currently used in various areas of building science and technology research and addresses the current lack of research method literature in this field The book covers the use of measurement based methods in which data is collected by measuring the properties and their variations in actual physical systems simulation based methods which work with models of systems or processes to describe examine and analyze their behaviors performances and operations and data driven methodologies in which data is collected via measurement or simulation to identify and examine the associations and patterns and predict the future in a targeted system The book presents a survey of key methodologies in various specialized areas of building science and technology research including window systems building enclosure energy performance lighting and daylighting computational fluid dynamics indoor and outdoor thermal comfort and life cycle environmental impacts Provides advanced insight into the research methods and presents the key methodologies within the field of building science and technology Reviews simulation based and experimentation field based methods of data collection and analysis in diverse areas of building science and technology such as energy performance window and enclosure studies environmental LCA daylighting CFD and thermal comfort Provides a range of perspectives from building science faculty and researcher contributors with diverse research interests Appropriate for use in university courses

The Routledge Handbook of Planning Research Methods Elisabete A. Silva, Patsy Healey, Neil Harris, Pieter Van den Broeck, 2014-08-21 The Routledge Handbook of Planning Research Methods is an expansive look at the traditions methods and challenges of research design and research projects in contemporary urban planning Through case studies an international group of researchers planning practitioners and planning academics and educators all recognized authorities in the field provide accounts of designing and implementing

research projects from different approaches and venues This book shows how to apply quantitative and qualitative methods to projects and how to take your research from the classroom to the real world The book is structured into sections focusing on Beginning planning research Research design and development Rediscovering qualitative methods New advances in quantitative methods Turning research into action With chapters written by leading scholars in spatial planning The Routledge Handbook of Planning Research Methods is the most authoritative and comprehensive handbook on the topic providing both established and ground breaking coverage of spatial planning research methods The book is an invaluable resource for undergraduate and graduate level students young professionals and practitioners in urban regional and spatial planning

Writing Built Environment Dissertations and Projects Peter Farrell, 2016-03-28 Writing Built Environment Dissertations and Projects will help you to write a good dissertation or project by giving you a good understanding of what should be included and showing you how to use data collection and analysis tools in the course of your research Addresses prominent weaknesses in under graduate dissertations including weak data collection superficial analysis and poor reliability and validity Includes many more in depth examples making it easy to understand and assimilate the concepts presented Issues around study skills and ethics are embedded throughout the book and the many examples encourage you to consider the concepts of reliability and validity Second edition includes a new chapter on laboratory based research projects Supporting website with sample statistical calculations and additional examples from a wider range of built environment subjects

Research Methods for Construction Richard F. Fellows, Anita M. M. Liu, 2015-07-07 Research Methods for Construction will help you instil rigour into your problem solving and into your reports and publications It will be of value to construction surveying architecture and civil engineering students undertaking research whether for bachelors and masters degree dissertations or for masters and doctoral research degree theses Now in its Fourth Edition this remains one of the few books to provide guidance on research formulation methodologies and methods specifically for construction students Three main sections Producing a Proposal Executing the Research and Reporting the Results discuss the key issues in research and examine the primary approaches both qualitative and quantitative The methods adopted for scientific and engineering experiments model building and simulations are discussed as well as those employed for research into management social and economic issues The authors examine the requirements for data and analysis including the important statistical considerations and a range of qualitative techniques that enable construction researchers to appreciate what needs to be evaluated in devising how research may be carried out effectively and efficiently This new edition has been updated to reflect current debates and concerns including ethical issues legislation and codes of practice concerning the collection processing storage use and disposal of data Pressures of time and funding to carry out the empirical work all too often lead to a lack of attention to how the study should be done and why The authors address the importance of explaining the philosophical approach adopted ontology epistemology and the consequent methodology They advocate close scrutiny of

the methods available for appropriateness both academically and practically The fundamental theme of the book remains to facilitate a researcher's informed and justified selection of a philosophical paradigm and of appropriate methods to execute the research

Research Methodology in the Built Environment Vian Ahmed, Alex Opoku, Zeeshan Aziz, 2016-03-10
Built environment students are not always familiar with the range of different research approaches they could be using for their projects Whether you are undertaking a postgraduate doctoral programme or facing an undergraduate or masters dissertation this book provides general advice as well as 13 detailed case studies from 16 universities in 7 countries to help you get to grips with quantitative and qualitative methods mixed methods of data collection action research and more

Secondary Research Methods in the Built Environment Emmanuel Manu, Julius Akotia, 2021-03-10 The use of secondary data for research can offer benefits particularly when limited resources are available for conducting research using primary methods Researchers and students at both undergraduate and postgraduate levels including their academic instructors are increasingly recognising the immense opportunities in applying secondary research methods in built environment research Advances in technology has also led to vast amounts of existing datasets that can be utilized for secondary research This textbook provides a systematic guide on how to apply secondary research methods in the built environment including their various underpinning methodologies It provides guidance on the secondary research process benefits and drawbacks of applying secondary research methods how to source for secondary data ethical considerations and the various secondary research methods that can be applied in built environment research The book incorporates chapters dealing with qualitative secondary analysis systematic literature reviews legal analysis bibliometric and scientometric analysis literature based discovery and meta analysis Secondary Research Methods in the Built Environment is an ideal research book for undergraduate and postgraduate students in construction management construction project management quantity surveying construction law and dispute resolution real estate and property management building services engineering architecture and civil engineering
