**OSSEC Host-based Intrusion Detection Guide** Andrew Hay,Daniel Cid,Rory Bray,2008 Stephen Northcutt OSSEC determines if a host has been compromised in this manner by taking the equivalent of a picture of the host machine in its original unaltered state This picture captures the most relevant information about that machine s configuration OSSEC saves this picture and then constantly compares it to the current state of that machine to identify anything that may have changed from the original configuration Now many of these changes are necessary harmless and authorized such as a system

administrator installing a new software upgrade patch or application But then there are the not so harmless changes like the installation of a rootkit trojan horse or virus      **Instant OSSEC Host-based Intrusion Detection System** Brad
