Advanced Techniques In Web Intelligence 1 Studies In Computational Intelligence:

Advanced Techniques in Web Intelligence -1 Juan D. Velásquez,2010-09-15 This book introduces a research applications in Web intelligence It presents a number of innovative proposals which will contribute to the development of web science and technology for the long term future rendering this work a valuable piece of knowledge **Innovations in Agent-Based Complex Automated Negotiations** Takayuki Ito,Minjie Zhang,Valentin Robu,Shaheen Fatima,Tokuro Matsuo,Hirofumi Yamaki,2010-10-14 Complex Automated Negotiations have been widely studied and are becoming an important emerging area in the field of Autonomous Agents and Multi Agent Systems In general automated negotiations can be complex since there are a lot of factors that characterize such negotiations These factors include the number of issues dependency between issues representation of utility negotiation protocol negotiation form bilateral or multi party time constraints etc Software agents can support automation or simulation of such complex negotiations on the behalf of their owners and can provide them with adequate bargaining strategies In many multi issue bargaining settings negotiation becomes more than a zero sum game so bargaining agents have an incentive to cooperate in order to achieve efficient win win agreements Also in a complex negotiation there could be multiple issues that are interdependent Thus agent s utility will become more complex than simple utility functions Further negotiation forms and protocols could be different between bilateral situations and multi party situations To realize such a complex automated negotiation we have to incorporate advanced Artificial Intelligence technologies includes search CSP graphical utility models Bays nets auctions utility graphs predicting and learning methods Applications could include e commerce tools decision making support tools negotiation support tools collaboration tools etc In this book we solicit papers on all aspects of such complex automated negotiations in the field of Autonomous Agents and Multi Agent Systems In addition this book includes papers on the ANAC 2010 Automated Negotiating Agents Competition in which automated agents who have different negotiation strategies and implemented by different developers are automatically negotiate in the several negotiation domains ANAC is one of real testbeds in which strategies for automated negotiating agents are evaluated in a tournament style **Advances in Practical Multi-Agent Systems** Quan Bai,Naoki Fukuta,2010-10-14 Multi Agent System MAS is an exciting emerging paradigm expected to play a key role in many society changing practices The International Conference on Principles and Practice of Multi Agent Systems PRIMA is a leading scientific conference for research on intelligent agent systems and multi agent systems attracting high quality state of the art research from all over the world PRIMA 09 was the 12th in the series of PRIMA conferences and was held in Nagoya Japan Beside a single track main conference PRIMA 09 also included a number of workshops which were designed to provide a forum for researchers and practitioners to present and exchange the latest developments at the MAS frontier This book constitutes the post proceedings of workshops under PRIMA 09 Readers will be able to explore a diverse range of topics and detailed discussions related to a number of important themes in our ever changing world This collection

plays an important role in bridging the gap between MAS theory and practice It emphasizes the importance of MAS in the research and development of smart power grid systems decision support systems optimization and analysis systems for road traffic and markets environmental monitoring and simulation and in many other real world applications and publicizes and extends MAS technology to many domains in this fast moving information age *Computer and Information Science 2010* Roger Lee,2010-09-16 The 9th ACIS IEEE International Conference on Computer Science and Information Science held in Kaminoyama Japan on August 18 20 is aimed at bringing together researchers and scientists businessmen and entrepreneurs teachers and students to discuss the numerous fields of computer science and to share ideas and information in a meaningful way This publication captures 18 of the conference s most promising papers and we impatiently await the important contributions that we know these authors will bring to the eld In chapter 1 Taewan Gu et al propose a method of software reliability estimation based on IEEE Std 1633 which is adaptive in the face of frequent changes to software requirements and show why the adaptive approach is necessary when software requirements are changed frequently through a case study In chapter 2 Keisuke Matsuno et al investigate the capacity of incremental learning in chaotic neural networks varying both the refractory parameter and the learning parameter with network size This approach is investigated through simulations which nd that capacity can be increased in greater than direct proportion to size In chapter 3 Hongwei Zeng and Huaikou Miao extend the classical labeled transition system models to make both abstraction and compositional reasoning applicable to deadlock detection for parallel composition of components and propose a compositional abstraction re nement approach

Intelligent Distributed Computing IV Mohammad Essaaidi,Michele Maugeri,Costin Badica,2010-08-12 The 33 peer reviewed contributions published in this book address a wide range of topics related to the theory and applications of intelligent distributed computing and multi agent systems They cover topics from bio informatics to semantic web services

Soft Computing for Recognition Based on Biometrics Patricia Melin,Witold Pedrycz,2010-09-20 This book describes bio inspired models and applications of hybrid intelligent systems using soft computing techniques for image analysis and pattern recognition based on biometrics and other sources Each section groups papers on a similar subject Soft Computing for Intelligent Control and Mobile Robotics Oscar Castillo,Witold Pedrycz,2010-10-05 This book describes in a detailed fashion the application of hybrid intelligent systems using soft computing techniques for intelligent control and mobile robotics Soft Computing SC consists of several intelligent computing paradigms including fuzzy logic neural networks and bio inspired optimization algorithms which can be used to produce powerful hybrid intelligent systems The prudent combination of SC techniques can produce powerful hybrid intelligent systems that are capable of solving real world problems This is illustrated in this book with a wide range of applications with particular emphasis in intelligent control and mobile robotics The book is organized in five main parts which contain a group of papers around a similar subject The first part consists of papers with the main theme of theory and algorithms which are basically papers that propose new models

and concepts which can be the basis for achieving intelligent control and mobile robotics The second part contains papers with the main theme of intelligent control which are basically papers using bio inspired techniques like evolutionary algorithms and neural networks for achieving intelligent control of non linear plants The third part contains papers with the theme of optimization of fuzzy controllers which basically consider the application of bio inspired optimization methods to automate the design process of optimal type 1 and type 2 fuzzy controllers The fourth part contains papers that deal with the application of SC techniques in times series prediction and intelligent agents The fifth part contains papers with the theme of computer vision and robotics which are papers considering soft computing methods for applications related to vision and robotics

Analysis of Temperament (Arab = Mizaj) by using different Data Mining Techniques Bapurao Bandgar,Ajit D. More,2021-02-01 Document from the year 2020 in the subject Engineering Computer Engineering language English abstract There are various classes of temperament of the persons Mizaj is the same as temperament in Unani Pathy of Arabic Here we have collected the data on different attributes various backgrounds and field for both male and female persons from Unani Medical College Pune We have tried to apply the Data mining rule Classification Association and Clustering by using the WEKA as Data Mining tool It was tried to classify the data using the various models of classification and found the Naive Bayse NB with train set data model showed good classification of the data into four classes with less relative absolute error and compare to J48 model and other models These are as Bilious Phlegmatic Sanguine and Melancholic type From the confusion matrix it is observed that the data has been correctly classified by Naive Bayse model As generally the Melancholic type persons are observed very rarely therefore it showed less % of Melancholic type According to the J48 model the Mizaj is classified in to three types and these are as bilious Phlegmatic sanguine These are classified depending upon the different attributes such as Sleeping hours Reaction Moist Body type Thorax Shape occupation and age It was also tried to find the relation between the attribute by applying the association rules and using Apriory model with 10 best rules These shows that there is some strong relation between different attributes such as Reaction strength Movement reaction speed and fear etc Depending upon the level of the anger the person gets troubled Thus based on the different attributes the temperament is classified into different types Further it was tried to cluster the data into different groups by using the K Means and EM model The EM model clustered the data into two types only which was not correct There are various classes of temperament of the persons Mizaj is the same as temperament in Unani Pathy of Arabic The data is

collected on different attributes various backgrounds and field for both male and female persons from Unani Medical College
