Advances in Apparel Production Catherine Fairhurst, 2008-05-28 Apparel production is a complex process often involving an international supply chain which must respond rapidly to the changing needs and tastes of consumers. This important book discusses the technological improvements which are transforming the speed, flexibility and productivity of the industry. The first part of the book reviews advances in apparel design. There are chapters on modelling fabric and garment drape, computer aided colour matching, yarn design and pattern making. Other chapters discuss key issues in apparel sizing and fit and the role of 3 D body scanning in improving garment fit and design. The second part of the book surveys advances in production, beginning with product development, before looking at advances in knitting, sewing, printing, finishing and fabric inspection. With its distinguished editor and international team of contributors, *Advances in apparel production* is a standard work for those researching and working in this important industry. Discusses the technological improvements transforming the speed, flexibility and productivity of the industry. Examines computer aided colour matching, garment drape and yarn design. Explores key issues in apparel sizing and fit, the role of three dimensional body scanning in improving garment fit and design.

Advancements in Textile Coloration Mohammad Shahid, Saptarshi Maiti, Shafat Ahmad Khan, Ravindra V. Adivarekar, 2025-08-02 The book highlights the latest innovations in sustainable textile dyeing and printing, addressing the industry's growing need for eco-friendly solutions. This comprehensive book covers many topics, including waterless dyeing, air and dope dyeing technologies, electrochemical dyeing and bio-based mordants and colorants. It also delves into microbial dyes, statistical approaches for optimizing coloration and advanced surface modification techniques. Additionally, the book examines the evolution of textile printing from conventional to digital methods and discusses strategies for mitigating textile effluent pollution. With a strong emphasis on sustainability, this resource is invaluable for researchers, industry professionals and academicians committed to advancing responsible textile coloration practices.

*Garment Manufacturing Technology* Rajkishore Nayak, Rajiv Padhye, 2015-05-26 *Garment Manufacturing Technology* provides an insiders look at this multifaceted process systematically, going from design and production to finishing and quality control. As technological improvements are transforming all aspects of garment manufacturing, allowing manufacturers to meet the growing demand for greater productivity and flexibility, the text discusses necessary information on product development, production planning and material selection. Subsequent chapters cover garment design, including computer aided design, CAD, advances in spreading, cutting and sewing, and new technologies including alternative joining techniques and seamless garment construction. Garment finishing, quality control and care labelling are also presented and explored. Provides an insiders look at garment manufacturing from design and production to finishing and quality control. Discusses necessary information on product development, production planning and material selection.
