### **Why Translation Studies**

**Matters** Daniel Gile,Gyde Hansen,Nike K. Pokorn,2010-02-25 Whether Translation Studies really matters is an important and challenging question which practitioners of translation and interpreting raise repeatedly TS scholars many of whom are translators and interpreters themselves are not indifferent to it either The twenty papers of this thematic volume contributed by authors from various parts of Europe from Brazil and from Israel address it in a positive spirit Some do so through direct critical reflection and analysis arguing in particular that the engagement of TS with society should be strengthened so that the latter could benefit more from the former Others illustrate the relevance and contribution of TS to society and to other disciplines from various angles Topics broached include the cultural mediation role of translators issues in literary translation knowledge as intellectual capital globalization through English and risks associated with it bridging languages mass media corpora training the use of modern technology interdisciplinarity with psycholinguistics and neurophysiology

**The Turns of Translation Studies**

Mary Snell-Hornby,2006-01-01 What's new in Translation Studies In offering a critical assessment of recent developments in the young discipline this book sets out to provide an answer as seen from a European perspective today Many new ideas actually go back well into the past and the German Romantic Age proves to be the starting point The main focus lies however on the last 20 years and beginning with the cultural turn of the 1980s the study traces what have turned out since then to be ground breaking contributions new paradigms as against what was only a change in position on already established territory shifting viewpoints Topics of the 1990s include nonverbal communication gender based Translation Studies stage translation new fields of interpreting studies and the effects of new technologies and globalization including the increasingly dominant role of English The author's aim is to stimulate discussion and provoke further debate on the current profile and future perspectives of Translation Studies

**Interpreting**

Schwieter,2015-01-15 Psycholinguistic and Cognitive Inquiries into Translation and Interpreting presents perspectives and original studies that aim to diversify traditional approaches in translation and interpreting research and improve the quality and generalizability of the field The volume is divided into two parts Part I includes an introductory discussion on the input of psycholinguistics and cognitive science to translation and interpreting along with two state of the art chapters that discuss valid experimental designs while critically reviewing and building on existing work Part II subsequently presents original studies which explore the performance of expert and novice translators

using a variety of methodologies such as eye tracking keystroke logging retrospective protocols and post editing machine translation It also presents contributions for exploratory studies on interpreting and for testing several constructs such as language competence and the role of expertise redundancy and working memory capacity This volume is intended to act as a valuable reference for scholars practitioners translators graduate and advanced undergraduate students and anyone wishing to gain an overview of current issues in translation and interpreting from psycholinguistic and cognitive domains

**Researching Translation and Interpreting** Claudia V. Angelelli,Brian James Baer,2015-07-16 This volume offers a comprehensive view of current research directions in Translation and Interpreting Studies outlining the theoretical concepts underpinning that research and presenting detailed discussions of the various methods used Organized around three factors that are responsible for shaping the study of translation and interpreting today post positivist theoretical approaches developments in the language industry and technological innovations this volume is divided into three parts Part I introduces the basic concepts organizing translation and interpreting research such as the difference between qualitative and quantitative research between product oriented and process oriented studies and between prescriptive and descriptive approaches Part II provides a theoretical mapping of current translation and interpreting research covering the theories underlying the current conceptualization of translation and interpreting from queer studies to cognitive science Part III explores the key methodological approaches to research in Translation and Interpreting Studies including corpus based longitudinal observational and ethnographic studies as well as survey and focus group based studies The international range of contributors are all leading research experts who use the methodologies in their work They present the research aims of these methods offer sample research questions that can and cannot be addressed by these methods and discuss modes of data collection and analysis This is an essential reference for all advanced undergraduates postgraduates and researchers in Translation and Interpreting Studies    *Beyond Descriptive Translation Studies* Anthony Pym,Miriam Shlesinger,Daniel Simeoni,2008-03-13 To go beyond the work of a leading intellectual is rarely an unambiguous tribute However when Gideon Toury founded Descriptive Translation Studies as a research based discipline he laid down precisely that intellectual challenge not just to describe translation but to explain it through reference to wider relations That call offers at once a common base an open and multidirectional ambition and many good reasons for unambiguous tribute The authors brought together in this volume include key players in Translation Studies who have responded to Toury s challenge in one way or another Their diverse contributions address issues such as the sociology of translators contemporary changes in intercultural relations the fundamental problem of defining translations the nature of explanation and case studies including pseudotranslation in Renaissance Italy Sherlock Holmes in Turkey and the coffee and sugar economy in Brazil All acknowledge Translation Studies as a research based space for conceptual coherence and creativity all seek to explain as well as describe In this sense we believe that Toury s call has been answered beyond expectations    **Teaching Dialogue**

**Interpreting** Letizia Cirillo,Natacha Niemants,2017-10-15 Teaching Dialogue Interpreting is one of the very few book length contributions that cross the research to training boundary in dialogue interpreting The volume is innovative in at least three ways First it brings together experts working in areas as diverse as business interpreting court interpreting medical interpreting and interpreting for the media who represent a wide range of theoretical and methodological approaches Second it addresses instructors and course designers in higher education but may also be used for refresher courses and or retraining of in service interpreters and bilingual staff Third and most important it provides a set of resources which while research driven are also readily usable in the classroom either together or separately depending on specific training needs and or research interests The collection thus makes a significant contribution in curriculum design for interpreter education
