

## NOMAD SERIES

### Portable Drying System

## Technical Specifications

NOMAD Portable Drying System provides users the ability to dry and convey materials in a single, compact, compact unit. Available in three configurations, operation can automatically convey material to the drying hopper, to the process machine, or both the hopper and the process machine. As of this is possible by integrating the conveying controls with the dryer which means that no additional air requirements for existing conveying systems are required when adding the Nomad. In addition, when equipped with an optional RFD pre-positioning valve, bulk materials (liquids, dryers and liquids) can be automatically conveyed to the drying hopper, eliminating the need to shut into from prior to drying.
