## **Asbestos Disaster Lessons From Japans Experience:**

*Asbestos Disaster* Kenichi Miyamoto, Kenji Morinaga, Mori Hiroyuki, 2011-03-15 Japan's asbestos disasters encompassing both occupational disease and environmental pollution have been caused principally by the asbestos textile asbestos cement water pipe and construction industries This book is unique in its interdisciplinary approach to those disasters as it incorporates medical science economics political science law architecture environmental engineering sociology and journalism Written by authorities in their fields the chapters reflect the integration of these disciplines in topics that include a historical review of asbestos issues in Japan asbestos related diseases international aspects of the asbestos industry public policy divisions of responsibility relief activities in emergencies and countermeasures enacted by local governments The lessons of asbestos problems and policies in Japan are particularly important for developing countries to prevent the proliferation of asbestos disasters This volume serves as a textbook on asbestos issues for all countries especially where there is widespread use of asbestos

**Asia-Pacific Disaster Management** Simon Butt, Hitoshi Nasu, Luke Nottage, 2013-10-29 The book outlines the regulatory environment for disaster prevention and management in broad social economic and political context The first half of the book focuses mainly on Japan especially the 3 11 events the earthquake and tsunami that devastated the Tohoku area on 11 March 2011 and the Fukushima Daiichi nuclear power plant radiation leaks The second half focuses on the USA the only other Asia Pacific country to have experienced a serious nuclear emergency Indonesia China New Zealand Australia and international law One question explored is whether socio legal norms play different roles in preventing and managing responses to natural disasters compared to man made disasters Another is how disaster law interacts with society across very diverse societies in the disaster prone Asia Pacific region The book also addresses the increasingly important roles played by international law and regional regimes for cross border cooperation in disaster prevention and relief including the functions played by military forces Erudite pragmatic and charged with detailed substantive knowledge of an astonishing range of contexts and research fields this timely collection of important essays on the law and society of disaster management stands as an exemplary international academic response to the disasters of 11 March 2011

Annelise Riles **Compensating Asbestos Victims** Andrea Boggio, 2016-05-23 This book traces the emergence and transformations of asbestos compensation to explore the wider issue of to what extent legal systems have converged in the era of globalization Examining the mechanism by which asbestos compensation is delivered in Belgium England Italy and the United States as well as the cultural forces and actors which contribute to its emergence and transformations the book advances our understanding of how law operates within cultural norms routines and institutional relations of capitalist societies With material gathered from 50 interviews and from primary and secondary sources the author considers law as a cultural phenomenon national styles of legal culture and the convergence and divergence of legal cultures and law as a form of institutionalized power

*Disease and Crime* Robert Peckham, 2013-12-04 Disease and crime are increasingly conflated in

the contemporary world News reports proclaim epidemics of crime while politicians denounce terrorism as a lethal pathological threat Recent years have even witnessed the development of a new subfield epidemiological criminology which merges public health with criminal justice to provide analytical tools for criminal justice practitioners and health care professionals Little attention however has been paid to the historical contexts of these disease and crime equations or to the historical continuities and discontinuities between contemporary invocations of crime as disease and the emergence of criminology epidemiology and public health in the second half of the nineteenth century When how and why did this pathologization of crime and criminalization of disease come about This volume addresses these critical questions exploring the discursive construction of crime and disease across a range of geographical and historical settings *Handbook of Recycled Concrete and Demolition Waste* F. Pacheco-Torgal, Yining Ding, 2013-09-30 The civil engineering sector accounts for a significant percentage of global material and energy consumption and is a major contributor of waste material The ability to recycle and reuse concrete and demolition waste is critical to reducing environmental impacts in meeting national regional and global environmental targets Handbook of recycled concrete and demolition waste summarises key recent research in achieving these goals Part one considers techniques for managing construction and demolition waste including waste management plans ways of estimating levels of waste the types and optimal location of waste recycling plants and the economics of managing construction and demolition waste Part two reviews key steps in handling construction and demolition waste It begins with a comparison between conventional demolition and construction techniques before going on to discuss the preparation refinement and quality control of concrete aggregates produced from waste It concludes by assessing the mechanical properties strength and durability of concrete made using recycled aggregates Part three includes examples of the use of recycled aggregates in applications such as roads pavements high performance concrete and alkali activated or geopolymers cements Finally the book discusses environmental and safety issues such as the removal of gypsum asbestos and alkali silica reaction ASR concrete as well as life cycle analysis of concrete with recycled aggregates Handbook of recycled concrete and demolition waste is a standard reference for all those involved in the civil engineering sector as well as academic researchers in the field Summarises key recent research in recycling and reusing concrete and demolition waste to reduce environmental impacts and meet national regional and global environmental targets Considers techniques for managing construction and demolition waste including waste management plans ways of estimating levels of waste the types and optimal location of waste recycling plants Reviews key steps in handling construction and demolition waste
