*Education as Social Action* A. Swain, 2005-06-01 Education plays a very important role in breaking the cycle of poverty and increasing opportunity Various forms of social movements play an important role in providing educational opportunities to communities and social groups that might otherwise be excluded filling the gap left by the state This book critically examines the origin and outcome of social action for education in different parts of the world *Water Diplomacy in Action* Shafiqul Islam, Kaveh Madani, 2017-01-02 Complex water problems cannot be resolved by numbers or narratives Contingent and negotiated approaches are necessary for actionable outcome In the face of a constantly changing

array of interconnected water issues that cross multiple boundaries the challenge is how to translate solutions that emerge from science and technology into the context of real world policy and politics Water Diplomacy in Action addresses this task by synthesizing two emerging ideas complexity science and negotiation theory to understand and manage risks and opportunities for an uncertain water future Rooted in the ideas of complexity science and mutual gains negotiation this edited volume shows why traditional systems engineering approaches may not work for complex problems what emerging tools and techniques are needed and how these are used to resolve complex water problems Order and Region Making in the Middle East Simon Mabon,Marc Lynch,2025-06-30 At a time of widespread instability in the Middle East this book reflects on the construction and contestation of order across the region Combining conceptual reflections with contemporary empirical analysis the book offers a timely account of how competing visions of order play out and shape the Middle East The book seeks to offer a discussion of the concept of order that is grounded in International Relations approaches but applied to the Middle East using a range of important case studies Bringing together established scholars and exciting new voices this collection is essential reading in understanding the shifting contours of the Middle East *Social Development in Independent India* Rajiv Balakrishnan,Muchkund Dubey,2008 Struggle Against the State Professor Ashok Swain,2013-03-28 Many developing countries pursue policies of rapid industrialization in order to achieve faster economic growth Some policies cause displacement forcing many individuals to take up a fight against the state Interestingly some of these dissenting individuals are more successful in organizing their protests than others In this book Ashok Swain demonstrates how displaced people mobilize to protest with the help of their social networks Studying protests against large industrial and development projects Swain compares the mobilization process between a traditionally protest rich and a protest poor region in India to explain how social network structures are a key component to understand this variation He reveals how improved mobilization capability coincides with their evolving social network structure thanks to recent exposure to external actors like religious missionaries and radical left activists The in depth examination of the existing literature on social mobilization and extensive fieldwork conducted in India make this book a well organized and useful resource to analyze protest mobilization in developing regions **Environment, Scarcity, and Violence** Thomas F. Homer-Dixon,2010-07-01 The Earth s human population is expected to pass eight billion by the year 2025 while rapid growth in the global economy will spur ever increasing demands for natural resources The world will consequently face growing scarcities of such vital renewable resources as cropland fresh water and forests Thomas Homer Dixon argues in this sobering book that these environmental scarcities will have profound social consequences contributing to insurrections ethnic clashes urban unrest and other forms of civil violence especially in the developing world Homer Dixon synthesizes work from a wide range of international research projects to develop a detailed model of the sources of environmental scarcity He refers to water shortages in China population growth in sub Saharan Africa and land distribution in Mexico for example to show that

scarcities stem from the degradation and depletion of renewable resources the increased demand for these resources and or their unequal distribution He shows that these scarcities can lead to deepened poverty large scale migrations sharpened social cleavages and weakened institutions And he describes the kinds of violence that can result from these social effects arguing that conflicts in Chiapas Mexico and ongoing turmoil in many African and Asian countries for instance are already partly a consequence of scarcity Homer Dixon is careful to point out that the effects of environmental scarcity are indirect and act in combination with other social political and economic stresses He also acknowledges that human ingenuity can reduce the likelihood of conflict particularly in countries with efficient markets capable states and an educated populace But he argues that the violent consequences of scarcity should not be underestimated especially when about half the world s population depends directly on local renewables for their day to day well being In the next decades he writes growing scarcities will affect billions of people with unprecedented severity and at an unparalleled scale and pace Clearly written and forcefully argued this book will become the standard work on the complex relationship between environmental scarcities and human violence
