Monismith,1984 This synthesis will be of interest to pavement designers and others concerned with the design of asphalt concrete overlays Information is presented on reasons for overlaying a pavement and on the various methods available for design of an asphalt overlay A pavement overlay may be required because of inadequate ride quality excessive pavement distress reduced friction between tire and pavement high user costs or inadequate structural capacity for planned use This report of the Transportation Research Board discusses the current methods used for designing asphalt concrete overlays with emphasis on deflection based and analytical procedures

pavement design permit issuance and fees for overloaded trucks and enforcement of truck weight laws Information is presented on the effects that overloads have on pavements and on the methods of accommodating or controlling overloads Highway pavements are designed for legal axle loads and loads above these will significantly shorten pavement life This report of the Transportation Research Board describes the effects on pavements of loads greater than those used in design gives information on permit issuance and fees for overloaded vehicles and describes the difficulties in enforcing truck weight laws **Principles of Construction of Hot-mix Asphalt Pavements** Asphalt Institute,1983 The manual is intended to provide information for the quality control of hot mix asphalt pavements Although emphasis is placed on the duties and responsibilities of asphalt inspectors good quality control procedures must also involve other personnel who should understand quality control procedures and efficient plant and paving practices The manual also details all aspects of hot mix asphalt pavement construction from the initial acceptance of the aggregate and asphalt to the laying and compaction
