

# Scoring Help

Use these tips to help you score ASQ®-3 questionnaires accurately every time.

## 1. Check for unanswered items

If responses are missing, contact parents to try to obtain answers. You may be able to help parents understand skipped items and get responses, or you can confirm if parents skipped them on purpose.

## 2. Review responses to the Overall section

Read parent responses to items in the Overall section—these give parents an opportunity to share comments about skills, risk factors, and concerns. Discuss any concerns with parents.

## 3. Review the questionnaire for corrections to sequential skill items

A few questionnaires include skills children may no longer perform because they have acquired more advanced skills—for example, sitting without using their hands for support instead of sitting while leaning on their hands for support. If the child performs the more advanced skill, the response for the earlier version of the skill should be marked YES. Sequential skills are marked with an asterisk and include scoring instructions. ASQ Online automatically corrects these item sequences.

## 4. Score each item on the questionnaire

Scored items on ASQ-3 address five areas of child development: communication, gross motor, fine motor, problem solving, and personal-social. Parents may mark YES, SOMETIMES, or NOT YET by filling in a bubble for each item response. To score each developmental area, use the following point value system:

- YES = 10 points
- SOMETIMES = 5 points
- NOT YET = 0 points

Anna Abraham,2015-11-23 The pervasive idea that madness and creativity are intricately linked is one that holds tremendous fascination for both scientists and the general public alike Although this view was at first largely driven by anecdotal evidence showcasing the manifestation of mental illness in individuals who exhibited extraordinary levels of creativity in various spheres of life it initiated a strong impetus to empirically investigate the association between mental health and creativity A variety of approaches and combinations of approaches have been adopted to address this association including clinical personality psychometric behavioral cognitive historiometric and neuroscientific

Despite the ever accumulating body of evidence over the past six decades investigating this link what is lacking is a comprehensive overview of the disparate findings from these different approaches that will enable us to address the question of whether there is an empirically founded relationship between creativity and mental illness And if such a link does exist what is the nature of this association The purpose of this Research Topic was to motivate theorists and researchers to answer this question or at least attempt to do so given the available evidence thus far The themes of interest that were open to exploration in view of this topic included a Which mental disorders are positively associated with creativity b Which mental disorders are negatively associated with creativity c The dynamics of information processing biases positive versus negative associated with psychiatric and high risk populations d Theories regarding the madness creativity link e Personality based studies on creativity f Creativity mental illness and the brain g Genes and creativity h How can studies on neurological populations inform this debate i What are the areas of impact with regard to real world applications and practice j Historical timeline of this question k Evolutionary perspectives on the madness creativity link l Methodological problems associated with this field m Philosophical issues to bear in mind when investigating this domain n The usefulness of the troubled genius concept The invitation to contribute was open to all interested academics regardless of whether they were seasoned explorers within this field of study or just beginning to get their feet wet in its murky waters As a result of adopting this inclusive approach the contributions showcase a wide variety of perspectives from academic departments and institutions the world over What is most encouraging is that so many were willing to openly take on the challenge of tackling this difficult question head on We hope future discussions that follow through as a result of this collective effort will prove to be just as fruitful
