Advanced Practice Nursing Contexts Of Care:

Advanced Practice Nursing Contexts of Care Lynette Hamlin, 2014-08-29 Advanced Practice Nursing Contexts of Care is a robust collection of practice focused case studies which address current issues in the evolving nursing profession targeting concerns of the advanced practice nurse. Throughout the text actual cases are used for the illustration and analysis of practice contexts which include organizational structure, managed care, inter and intra professional issues, politics, power, finance, planning, regulation, ethics, law, quality, and patient safety. Discussion around opportunities for nursing to extend practice into new forms and environments is also covered. The text is a very valuable tool for case based teaching format around policy issues that directly impact practice and Master's prepared nurses. Each case is interspersed with discussion questions which guide case discussions in both specific and global issues within the case. In addition, each case has a list of references that can be used to guide the cases. Unlike other health policy texts, this text focuses on cases that bring application to those health policy issues. This text is also a solid resource for practitioners interested in keeping current on issues that guide clinical practice. Key Objectives: Appreciate the regulatory and legal environment that surrounds practice. Analyze the influences of the working and regulatory contexts upon nursing practice. Integrate an understanding of history and development of trends and issues into contemporary practice. Provide a differential diagnosis among political, policy, regulatory, legal, and professional causes of contextual problems. Propose solutions to contextual problems. Value experience as data.

Advanced Practice Nursing: Contexts of Care, 2009 **Advanced Practice Nursing** Susan M.

DeNisco, Anne M. Barker, 2016 Advanced Practice Nursing Essential Knowledge for the Profession Third Edition is a core advanced practice text used in both Master's Level and DNP programs. The Third Edition is a unique compilation of existing chapters from a variety of high level Jones Bartlett Learning works creating a comprehensive and well rounded resource for the advanced practice nursing student. Similar to the previous edition, The Third Edition features updated content around the AACN's Master's Essentials as well as the Essentials for Doctoral Education. Throughout this text, the authors address the rapid changes in the health care environment with a special focus on health care finance, electronic health records, quality and safety, as well as emerging roles for the advanced practice nurse. Patient care in the context of advanced nursing roles is also covered.

Clinical Reasoning and Care Coordination in Advanced Practice Nursing RuthAnne Kuiper, Daniel J. Pesut, Tamatha E. Arms, 2016-04-28 Teaches students how to think like an APRN. This book describes an innovative model for helping APRN students develop the clinical reasoning skills required to navigate complex patient care needs and coordination in advanced nursing practice. This model, the Outcome Present State Test (OPT), encompasses a clear step by step process that students can use to learn the skills of differential diagnosis and hone clinical reasoning strategies. This method facilitates understanding of the relationship among patient problems, outcomes and interventions that focus on promoting patient safety and care coordination. It moves beyond traditional ways of problem solving by focusing on patient scenarios and stories and juxtaposing issues and outcomes that have been derived from an analysis of patient problems, evidence based interventions and desired outcomes. The model offers a blueprint for using standardized health care languages and provides strategies for developing reflective and complex thinking that becomes habitual. It embodies several levels of perspective related to patient centered care planning, team centered negotiation and health care system considerations. Through patient stories and case scenarios, the text highlights care coordination strategies critical in complex patient situations. It provides students with the tools to collect patient information, determine priorities for care and test interventions to reach health care outcomes by making clinical judgments during the problem solving process. Concept maps illustrate complex patient care issues and how they relate to each other. For faculty, the text provides links to relevant APN competencies and provides guidelines for using the OPT when supervising students in field settings. Key Features: Delivers a concrete learning model for developing creative thinking and problem solving in the clinical setting. Offers a blueprint and structure for using standardized health care languages. Includes patient stories and case scenarios to illustrate effective use of the OPT model. Highlights care coordination strategies associated with complex client situations with the use of the Care Coordination Clinical Reasoning model. Reinforces methods of reaching a diagnosis, outcomes and interventions and how to duplicate the process.

Nursing Issues in Leading and Managing Change Jeanette Lancaster, 1999. NURSING ISSUES IN LEADING AND MANAGING CHANGE provides current cutting edge information to guide nurses who are responsible for managing change in our health care system. The text covers the changes in the systems of health care, role theory, decision process, social and cultural settings, ethical and legal issues, credentialing, management skills, managed care, and nursing informatics. The book is organized in three parts: change theory, the environment of change, and effecting change in the health care system. Each chapter provides consistent features including objectives and key points to emphasize important information the student needs to know. Key terms boxes are integrated throughout the chapters to highlight important vocabulary terms used in today's health care environment. Chapters conclude with critical thinking questions to enhance

learning and to reinforce critical thinking skills. Discusses critical issues that affect nurses today and assists them in preparing for future practice. Provides substantive core content based on business practices to help the nurse more effectively deal with issues related to their practice. Includes an introduction in every chapter to pique students' interest and set the context of material to follow. Offers objectives to provide the student a clear understanding of the outcomes expected after reading each chapter. Integrates key points at the end of the chapter to emphasize important information the student will need to know. Includes critical thinking questions at the end of each chapter to help students assess their own strengths, areas of improvement, values, attitudes, and goals. Features key term boxes throughout each chapter to highlight important vocabulary terms used in today's health care environment. Presents a three part organization: the theoretical foundations for change, the environment in which changes occurs, and effecting change in the health care system to help organize the material in a logical fashion for student comprehension. Provides a consistent format in each chapter to make the material more user friendly for the student.

Advanced Practice Roles in Long Term Care Isaac Githinji, 2022-01-21 Academic Paper from the year 2019 in the subject Nursing Science Nursing Management grade 3 9 University of South Florida language English abstract The purpose of this paper is to review all APN Advanced Practice Nurse roles and then look at my specialty including the core competencies, certification requirements, scope of practice and legal aspects for this particular position. The paper will also discuss the practice environment, population and colleague health care professionals I will be working with as well as the future leadership role and contribution to professional organizations. The evolving needs of patients and the growing complexity of health care delivery models have generated a demand for several specialized health care professionals comprising APNs. APNs have an essential role holding a wide range of executive and managerial positions that significantly influence the health care industry. These specialized health care professionals have expanded the alternatives for health service delivery as well as facilitating the development of more pathways to healthcare careers and leadership opportunities for nurses. It should be noted that APNs are made up of nurse practitioners, nurse administrators, nurse educators, or nurse informaticists. Each APN performs a distinctive role, however, their responsibilities may intersect in some areas. Guided by fundamental skills and an understanding of the connection between education, experience, and patient outcomes, each APN plays a crucial part in the healthcare context.
