**Ashu Dutt's 22 Day Trading Secrets** Ashu Dutt, 2014-10-20 Trading is one of the most rewarding careers that you can choose It is a rare combination of chart reading and self control If you can have both you have an unbelievable edge over others in the market While we would like to believe that stocks rise on fundamentals almost none of us will agree on what the fundamentals are Is PE Cash Flow Debt levels Inventory levels etc or all of them fundamentals What we consider fundamentals is a representation not the actual picture of the company's true fundamentals Even when we know the fundamentals human beings make investing decisions that are heavily influenced by their emotions and their dreams and aspirations Trading is based on charts and charts are based on Price Volume and Time While price indicates an uptrend or downtrend a rise or fall in price accompanied by heavy volumes confirms the direction of the move And if a rise in price is backed by heavy volumes and continues for a few days or longer it confirms the stock's direction And for this reason charts will only work if the promoters have integrity The integrity of the promoters infects charts Charts also work when there are willing buyers and willing sellers who have not been manipulated into believing in fixed charts CHARTS WITHOUT ENOUGH BUYERS AND SELLERS DON T REFLECT REAL SUPPLY AND DEMAND OR REAL EMOTIONS Any chart that does not reflect a real emotion or creates an artificial supply or an artificial demand will not deliver It is best to stick to stock of companies with impeccable reputations One of the toughest things to do is play against our intuition and the way we are programmed For example our recollection and thus our reactions are sharpest to things that have happened lately or in the immediate past rather than the most significant events that have happened in our life When we buy something for 100 rupees we usually don't want to sell it till it gets back to 100 i.e. if we have a loss There is a whole gap between 100 and when the value has dropped so low like lets say 20 where we go into a decision limbo That is not how we do things when we buy something at 20 and it runs to 100 Usually we sell it at lets say 30 or some mark we set in our mind If we hold it and it does reach 100 and starts to fall we tend to believe it will come back to

100 In the process we lose the gains we already have **The Penguin Guide to Winning on the Stock Market** Ashu Dutt,2001-01-01 A comprehensive guide to understanding the stock market To the uninitiated the stock market can appear a forbidding place where years of savings can be wiped out overnight Yet for the informed investor it is one of the most effective ways to increasing wealth In this accessible guide Ashu Dutt author of The Penguin Guide to Personal Finance provides expert advice on how the stock market works what shares are all about and what the wise investor should look out for Drawing upon his years of experience as a broker and an investment adviser he offers a fresh perspective on the inner workings of the Indian stock market But most important he informs the reader of winning strategies the tools weapons and intelligence needed to navigate the market The book covers among the other topics Market mechanics How the price of a stock is determined Tools of the trade Stock market indices Developing an investment philosophy What kind of stocks to pick Extremely reader friendly this book should enable even a layman investor to rub shoulders confidently with the bulls and the bears of the stock market [Ashu Dutt's 26 Rules of Value Investing](#) Ashu Dutt,2014-10-20 Value Investing carries a sophisticated connotation It carries a feeling of making money in stocks by hard work and research Perhaps it appeals to our middle class mentality i e To make money you have to work hard In this book I will go beyond this narrow definition of buying stocks because value investing is largely misconstrued as buying cheap or buying stocks with low PEs or buying stocks because the Book value is way lower than the price While this may be part of what value investing is all about such an approach rests on conventional thinking and makes several assumptions which may be plain wrong It is like getting into a pool expecting it to be 5 feet deep and finding out it is 11 feet deep In that case either you know how to swim or you needed to make a much better guess of the depth Once you finish reading this book you will have a pretty good idea of figuring out the depth of a pool or learn to swim even if the pool is deep
