The Psychology of Theft and Loss Robert Tyminski,2014-07-11 Why do we steal This question has confounded everyone from parents to judges teachers to psychologists economists to more than a few moral thinkers Stealing can be a result of deprivation of envy or of a desire for power and influence An act of theft can also bring forth someone's hidden traits paradoxically proving beneficial to their personal development Robert Tyminski explores the many dimensions of

stealing and in particular how they relate to a subtle balance of loss versus gain that operates in all of us Our natural aversion to loss can lead to extreme actions as a means to acquire what we may not be able to obtain through time work or money Tyminski uses the myth of Jason Medea and the Golden Fleece to explore the dilemmas involved in such situations and demonstrate the timelessness of theft as fundamentally human The Psychology of Theft and Loss incorporates Jungian and psychoanalytic theories as well as more recent cognitive research findings to deepen our appreciation for the complexity of human motivations when it comes to stealing culminating in consideration of the idea of a perpetually present inner thief Combining case studies Jungian theory and analysis of many different types of stealing including robbery kidnapping plagiarism and technotheft The Psychology of Theft and Loss is a fascinating study which will appeal to psychoanalysts psychologists psychiatrists social workers family therapists and students

Mindfulness in Good Lives Mike W. Martin, 2019-10-23 Mindfulness is celebrated everywhere especially in health psychology and spiritual practices but also in the arts business education environmentalism sports and the use of digital devices While the current mindfulness movement may be in part the latest fad in a narcissistic and therapeutic culture it is also worthy of greater philosophical attention As a study in ethics and moral psychology Mindfulness in Good Lives remedies the neglect of this subject within philosophy Mike W Martin makes sense of the striking variety of concepts of mindfulness by connecting them to the core idea of value based mindfulness paying attention to what matters in light of relevant values When the values are sound mindfulness is a virtue that helps implement the kaleidoscope of values in good lives Health psychologists who currently dominate the study of mindfulness often present their research as value neutral science Yet they invariably

presuppose moral values that should be made transparent These values which lie at the interface of morality and mental health form bridges between philosophy and psychology and between literature and spirituality
