guide readers in the correct execution and teaching of stretching and resistance training exercises. This section also includes a set of eight new dynamic stretching exercises. Section 4 examines the design of strength training and conditioning programs. The information is divided into three parts: anaerobic exercise prescription chapters 15 through 17; aerobic endurance exercise prescription chapter 18; and periodization and rehabilitation chapters 19 and 20. Step by step guidelines for designing resistance, plyometric, speed, agility, and aerobic endurance training programs are shared. Section 4 also includes detailed descriptions of how principles of program design and periodization can be applied to athletes of various sports and experience levels. Within the text, special sidebars illustrate how program design variables can be applied to help athletes attain specific training goals. Section 5 chapters 21 and 22 addresses organization and administration concerns of the strength training and conditioning facility manager, including facility design, scheduling policies and procedures, maintenance and risk management. Chapter objectives, key points, key terms and self study questions provide a structure to help readers organize and conceptualize the information. Unique application sidebars demonstrate how scientific facts can be translated into principles that assist athletes in their strength training and conditioning goals. *Essentials of Strength Training and Conditioning* also offers new lecture preparation materials. A product specific Web site includes new student lab activities that instructors can assign to students. Students can visit this Web site to print the forms and charts for completing lab activities or they can complete the activities electronically and email their results to the instructor. The instructor guide provides a course description and schedule, chapter objectives and outlines, chapter specific Web sites and additional resources, definitions of primary key terms, application questions with recommended answers and links to the lab activities. The presentation package and image bank delivered in Microsoft PowerPoint offers instructors a presentation package containing over 1 000 slides to help augment lectures and class discussions. In addition to outlines and key points, the resource also contains over 450 figures, tables and photos from the textbook which can be used as an image bank by instructors who need to customize their own presentations. Easy to follow instructions help guide instructors on how to reuse the images within their own PowerPoint templates. These tools can be downloaded online and are free to instructors who adopt the text for use in their courses. *Essentials of Strength Training and Conditioning* Third Edition provides the latest and most comprehensive information on the structure and function of body systems, training adaptations, testing and evaluation, exercise techniques, program design and organization and administration of facilities. Its accuracy and reliability make it not only the leading preparation resource for the CSCS exam but also the definitive reference that strength and conditioning professionals and sports medicine specialists depend on to fine tune their practice.
