Film Criticism in the Digital Age Mattias Frey,Cecilia Sayad,2015-04-20 Over the past decade as digital media has expanded and print outlets have declined pundits have bemoaned a crisis of criticism and mourned the death of the critic Now that well paying jobs in film criticism have largely evaporated while blogs message boards and social media have given new meaning to the saying that everyone s a critic urgent questions have emerged about the status and purpose of film criticism in the twenty first century In Film Criticism in the Digital Age ten scholars from across the globe come together to consider whether we are witnessing the extinction of serious film criticism or seeing the start of its rebirth in a new form Drawing from a wide variety of case studies and methodological perspectives the book s contributors find many signs of the film critic s declining clout but they also locate surprising examples of how critics whether moonlighting bloggers or salaried writers have been able to intervene in current popular discourse about arts and culture In addition to collecting a plethora of scholarly perspectives Film Criticism in the Digital Age includes statements from key bloggers and print critics like Armond White and Nick James Neither an uncritical celebration of digital culture nor a jeremiad against it this anthology offers a comprehensive look at the challenges and possibilities that the Internet brings to the evaluation promotion and explanation of artistic works

Activist Citizenship Education Keith Heggart,2021-01-02 This book explores alternative models of civics and citizenship education Specifically it uses Justice Citizens a participatory research and film making project as a tool to examine young people s ideas about active citizenship and participation in public spaces It introduces a framework that seeks to explore the diverse and apparently contradictory nature of young people s active citizenship The framework draws on complexity theory combined with critical pedagogy and democratic education to formulate an approach to developing active citizenship among young people This approach extends theories of both critical pedagogy and education for citizenship and by doing so seeks to explain the variegated nature of young people s engagement with civil society This book contains a

Academics engaged in initial teacher education at both primary and secondary levels will find the framework of use when describing the importance and new approaches to civics and citizenship education within the current school and policy environments.

Nexus Yuval Noah Harari, 2024-09-10 1 NEW YORK TIMES BESTSELLER From the author of *Sapiens* comes the groundbreaking story of how information networks have made and unmade our world. Strikingly original, A historian whose arguments operate on the scale of millennia has managed to capture the zeitgeist perfectly. The Economist. This deeply important book comes at a critical time as we all think through the implications of AI and automated content production. Masterful and provocative. Mustafa Suleyman, author of *The Coming Wave*. For the last 100 000 years we *Sapiens* have accumulated enormous power. But despite all our discoveries, inventions and conquests, we now find ourselves in an existential crisis. The world is on the verge of ecological collapse. Misinformation abounds. And we are rushing headlong into the age of AI, a new information network that threatens to annihilate us. For all that we have accomplished, why are we so self-destructive? *Nexus* looks through the long lens of human history to consider how the flow of information has shaped us and our world. Taking us from the Stone Age through the canonization of the Bible, early modern witch hunts, Stalinism, Nazism, and the resurgence of populism today, Yuval Noah Harari asks us to consider the complex relationship between information and truth, bureaucracy and mythology, wisdom and power. He explores how different societies and political systems throughout history have wielded information to achieve their goals for good and ill. And he addresses the urgent choices we face as non-human intelligence threatens our very existence. Information is not the raw material of truth; neither is it a mere weapon. *Nexus* explores the hopeful middle ground between these extremes and, in doing so, redisCOVERS our shared humanity.

The Routledge Companion to Criticality in Art, Architecture, and Design Chris Brisbin, Myra Thiessen, 2018-10-03. The Routledge Companion to Criticality in Art, Architecture and Design presents an in-depth exploration of criticism and criticality in theory and practice across the disciplines of art, architecture and design. Professional criticism is a vital part of understanding the cultural significance of designed objects and environments that we engage with on a daily basis; yet there is evidence to show that this practice is changing. This edited volume investigates how practitioners, researchers, educators and professionals engage with, think about and value the practice of critique. With contributions from a multi-disciplinary authorship from nine countries (the UK, USA, Australia, India, Netherlands, Switzerland, South Africa, Belgium and Denmark), this companion provides a wide range of leading perspectives evaluating the landscape of criticality and how it is being shaped by technological and social advances. Illustrated with over 60 black and white images and structured into five sections, *The Routledge Companion to Criticality in Art, Architecture and Design* is a comprehensive volume for researchers, educators and students exploring the changing role of criticism through interdisciplinary perspectives.
