## **A Quantum City Applied Virtuality :**

*A Quantum City* Ludger Hovestadt,Vera Bühlmann,2015-06-16 We know the specific strengths of various cities are aware of their ranking are able to discuss their density and growth But what do all cities have in common what do we know about the lowest common denominator The city as a species the primal genetic material of the city this is the subject of *A Quantum City* This colossal work is a love letter to the city and intellectual culture We follow the fictional narrative figure Orlando beginning in 320 BC on his odyssey through the Western world up to the present time The book is divided into four interrelated chapters and can be read page by page in a discursive manner however randomly browsing through the book also offers new and multi faceted interpretations Great intellectual achievements are compared with obscure and mundane events *A Quantum City* offers an inspiring view of the city that is in us and around us

**A Genius Planet** Ludger Hovestadt,Vera Bühlmann,Sebastian Michael,2017-07-24 Imagine a world where the power is always on where there is not just enough energy but an abundance of it Such a world is no Utopia it is a possible reality Using indefinitely available sources of energy especially photovoltaic solar in combination with others and networking this energy much in the way that we have networked information we can get beyond our current energy crisis and resolve it The world we then find ourselves in is not a world without problems we will face new challenges on the way but in terms of energy it is a world of plenty Rooted in sound theory and based on technology that is available now *A Genius Planet* offers an accessible but detailed and insightful perspective on how we can free ourselves from our dependency on natural resources and generate trade and use energy in ways that open up the genuine potential that we have at our disposal today

**Ghosts of Transparency** Michael R. Doyle,Selena Savić,Vera Bühlmann,2019-09-23 In this book the editors focus on architecture and communication from various different perspectives taking into account that the term architecture is used for buildings as well as in the context of computer software Data and software also impact on our cities raw data however do not convey any information in order to generate information and communication they have to be organized and must make sense to the reader The contributions avoid clear separation of the various communication spheres of their disciplines Instead they use the wide range of approaches to explore meanings an ambitious aim that leaves the destination wide open the reader is invited to share in this adventure

**Play Among Books** Miro Roman,Alice \_ch3n81,2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice \_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science

**Architecture and Naturing Affairs** Mihye An,Ludger Hovestadt,2020-10-26

In this anthology with contributions about architecture media and infrastructure technology the authors investigate in what multifaceted way architecture and information is in tune with contemporary technology and in what way we live with them The book is divided into following parts BREEDING medialising matter BREATHING transcending language and INHABITING making things inhabitable The compilation of various text contributions creates a lexicon of naturing affairs and is written for readers who look for an inspiring overview of our medialised environments     **MATHEMATICAL THINKING** Elias Zafiris,2025-09-23 The two most predominant characteristics of mathematical thinking are abstraction and diachronic validity The currently dominant division between pure and applied mathematics eradicates both how abstraction always guides method and how the universality that pertains to mathematics constitutes transhistorical and transcultural validity By the method guided by abstraction this book understands a process of percolation which allows the filtering out of all irrelevant details pertaining to a particular problem so that the invariants of this problem can be revealed exposed communicated and translated to help coping with a similar problem in another situation It is through the finding of such invariances that the diachronic validity of mathematical thinking can be enunciated beyond the writing of a linearly progressing history of mathematics and also beyond the analytical fixation with axiomatics and foundation in a historical manner The proposed view on mathematical thinking and the creativity and inventiveness inherent to it can connect in a surprising manner current physics with computation and the rich legacy of thinking the cosmos architectonically in philosophy and in the arts This book guides in an introductory manner through some of the many implications that come with this proposed involution     **Urban Arabesques** Gray Kochhar-Lindgren,2020-02-14 Urban Arabesques examines philosophy as an event of the city and the city as an event of philosophy and how the intertwining of the two generates an urban imaginary This critique in motion of creative figures and conceptual personae from non philosophy illuminates the emergence of sense in the city shows how transcendental empiricism operates within it and how the everyday life of the streets the ordinariness of experience as well as the screen projector of urban surfaces uncovers new pathways for politics experience and relationalities Using Hong Kong as the primary site of thinking yet recognizing that thinking incessantly moves beyond any particular location the book opens up cities within the city Traversing Hong Kong reveals how the corners the money the trees and the water are involved in philosophy Combining the linguistic approach found in Heidegger and Derrida with the more materialist analysis of Serres and Deleuze the objective of this book is to retheorize the urban and its imaginary its virtuality irreality phantasmicity with an emphasis on signs images and rhythms resonating through philosophy and beyond     *Architecture* ,1992     **Micro-electronics Monitor** ,1991     Microelectronics Monitor ,1994     **Applied Science & Technology Index** ,2000     **Social Sciences Index** ,1995     **International Aerospace Abstracts** ,1999
